VieBee Project Specification

VieBee Team

Table of Contents

Requirements:
You must submit two separate files:

1. Final Pitch Deck (PDF or slide deck format, ~15-20 slides)

2. Demo File: product visualization in the form of images or a short demo video (Proof of Concept, Prototype, or High-Fidelity UI/UX)

3. Use visuals (tables, personas, infographics, charts, etc.) in your Pitch Deck to enhance clarity.

4. The Demo File should clearly illustrate your product/solution and support the content presented in your Pitch Deck.

Objectives:

- Complete your Final Pitch Deck, showcasing the results of all five milestones.

- Demonstrate your team's ability in analysis, creativity, and turning ideas into practical solutions.

The Organizing Team will use the Final Submission to select the Top 40 teams for the In-person Phase.

Link to final pitch deck: https://canva.link/o6do24r75bgf969

a. Cover Slide

- Project/Startup name

- Logo

- Tagline

b. Problem

- A clear, specific, and urgent problem being addressed

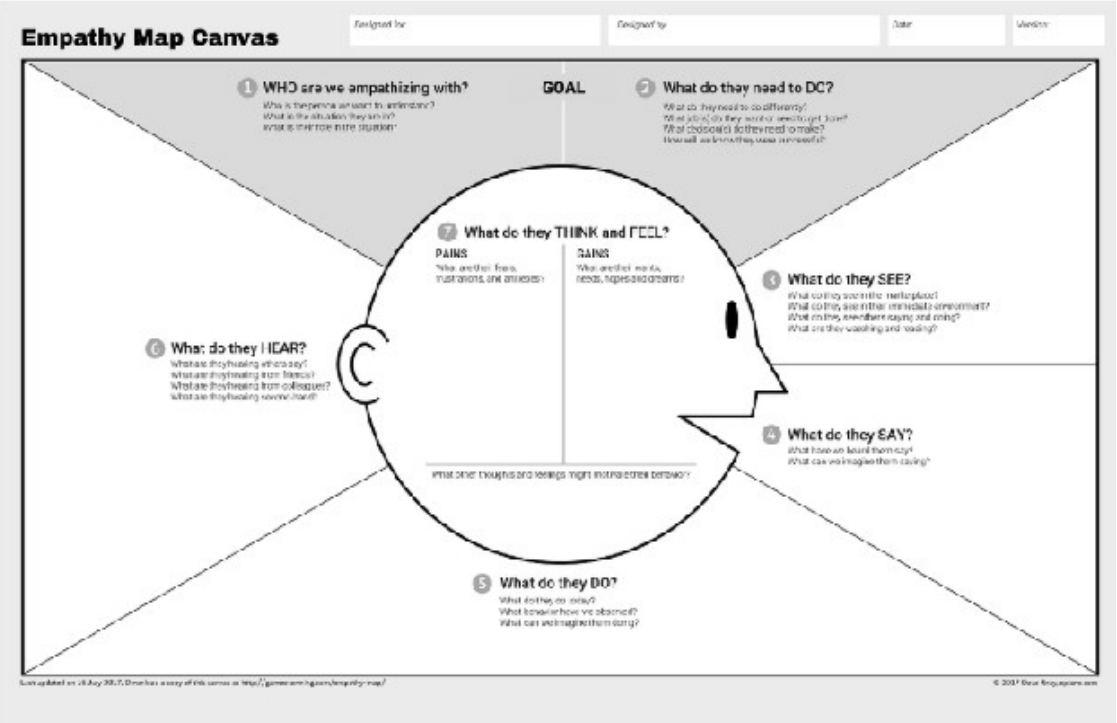

- Pain points supported by data or evidence

c.Initial Market Research

- Market segmentation and sizing: TAM - SAM - SOM
- Target customer segment(s)
- Competitive landscape: 5 Forces or PESTEL analysis with key competitors and alternative solutions

d. User Understanding

- User Persona:
  - Build using key persona elements (background, goals, behaviors, challenges, etc.)
  - Use the provided User Persona Template to create a clear profile that differentiates one segment from another
- Empathy Map:
  - Map insights into user needs, thoughts, and behaviors
  - Helps explain why users act the way they do and what truly motivates them beneath the surface

e. Concept Statement & Hypothesis

- Product/Service description and key features

- USP (Unique Selling Point): what makes your solution stand out
- Hypotheses/assumptions to be validated with users
- How your solution solves the problem better than current alternatives

f. MVP/Solution Demo

- Include 1-2 slides in your Pitch Deck to briefly introduce your MVP/solution (e.g., Proof of Concept, Prototype, or High-Fidelity UI/UX design).

Note: A more detailed explanation of how your MVP works must be submitted as a separate file (images or video) attached alongside your Final Submission.

g. Value Proposition Canvas

- Customer Profile: pains, gains, jobs-to-be-done
- Value Map: how your solution creates value and relieves pains

h. Research & MVP Development Plan

- Clear plan for In - person Phase MVP development and research
- Approach for customer acquisition and market expansion

i. Team structure

- Core members, roles, and capabilities
- Key strengths and unique expertise

Chau

- PM/BA
- Fullstack Developer

Description: my expertise covers the complete process of building and launching applications.

- **App Development:** web and mobile apps, hands-on experience integrating artificial intelligence into practical, real-world tools.
- **AI & Machine Learning:** training AI models, working with image recognition, and adding smart features directly into applications.
- **Leadership:** led teams in many hackathon, startups projects

Tuan

- AI, R&D Engineer

Description: Computer Science student specializing in AI/ML engineer, Data scientist.

AI & Machine Learning: Hands-on experience with Deep Learning, Natural Language Processing (NLP), and Computer Vision (CV), including model training and application development.

Data Science: Data analysis, preprocessing, visualization, statistical analysis, and machine learning.

Achievements: Potential prize in Vinasa-Vietfuture Awards (2026); 2nd Place at the TDTU Student Scientific Research Competition.

Htet

- Agentic AI & DevOps Engineer

Description: Software Engineering student specializing in full-stack development, DevOps, and Agentic AI engineering.

Project Experience: Academic projects and AI Engineering Internship at Nhabe Garment Corporation.

Leadership & Achievements: Delegate at AJYF (2023) and ISSF (2024); Da Z Nang Award Winner at the UEH BizTech Hackathon (2025); 2nd Place at the TDTU Student Scientific Research Competition.

Long

- Backend Developer

Kaka

- Data Engineer

May be your core and unique expertise, and should be short
You guys can check the slide for references: https://canva.link/o6do24r75bgf969

13. Tên ý tưởng
Your idea
Vietnamese: VieBee - Khắc họa di sản, Nâng tầm cộng đồng
English: VieBee - Mapping Living Heritage, Empowering Communities

14. Hãy mô tả ý tưởng của bạn
Please describe your idea
CTA: Discover Vietnam Beyond the Guidebooks, Hosted by the Neighbors Who Live It.

Pitch:
"When an international traveler visits Vietnam, they rarely get to sit in an authentic family kitchen and learn how to brew traditional chè or weave bamboo from an elderly artisan. ***AppName****, unlocks these tucked-away experiences. We provide a community-verified workshop platform and dynamic cultural map where vetted local hosts create micro-experiences, manage*

RSVPs, and bridge the language gap via an AI cultural copilot, keeping tourism dollars directly inside the community."

Core Value Proposition:

- **For Travelers:** Safe, authentic, off-the-beaten-path micro-workshops with guaranteed quality control and automated translation assistance.

- **For Locals:** A dignified, low-friction micro-entrepreneurship tool with zero complex tech setup needed.

- **For Cities:** Preservation of intangible cultural heritage by creating economic incentives for traditional crafts and recipes to survive.

17. Hãy nêu các lý do chứng minh đây là một ý tưởng có giá trị và có thể phát triển nhanh trong tương lai
Please clarify why this is a good idea that have high-growth potential in the future

Vietnamese:

- **Có giá trị (Value-driven):** Hưởng ứng xu hướng du lịch trải nghiệm (Experiential Travel) đang bùng nổ. Du khách hiện đại không chỉ muốn ngắm cảnh; họ muốn "xắn tay áo" làm chè, đan lát, học văn hóa cùng người bản địa. Dự án mang lại giá trị kép: giữ gìn di sản văn hóa phi vật thể và tạo sinh kế bền vững cho người dân địa phương (đáp ứng tiêu chí ESG và phát triển bền vững).

- **Khả năng tăng trưởng nhanh (Scalability):** Ứng dụng mô hình kinh tế chia sẻ (Peer-to-Peer Marketplace) kết hợp công nghệ. Thay vì phải tự tổ chức tour, nền tảng chỉ cung cấp công cụ (RSVP, Cultural Map). Đặc biệt, việc tích hợp AI (LangChain RAG chatbot) giúp phá vỡ rào cản ngôn ngữ - nút thắt lớn nhất của du lịch cộng đồng - cho phép hệ thống dễ dàng mở rộng (scale-up) từ một xóm nhỏ, một thành phố, ra toàn quốc và khu vực Đông Nam Á với chi phí vận hành cực thấp.

English:

- **High Value:** It taps into the booming trend of Experiential and Sustainable Travel. Modern tourists no longer want passive sightseeing; they want authentic, hands-on immersion (e.g., cooking local dishes, crafting). The project delivers dual value: it preserves intangible cultural heritage while injecting tourism revenue directly into local households (aligning with ESG goals).

- **High-Growth Potential (Scalability):** It utilizes a highly scalable Peer-to-Peer (P2P) marketplace model. The platform doesn't need to hire tour guides or buy physical assets. By leveraging AI (LangChain RAG chatbots) to eliminate the biggest bottleneck—the language barrier between locals and foreigners—the platform can scale exponentially from a single neighborhood to nationwide, and eventually across Southeast Asia, with minimal operational cost.

18. Lĩnh vực hoạt động của dự án?
Which industry/industries does your Startup serve?
Vietnamese: Văn hoá - Xã hội
English: Culture - Social

19. Problem Statement - Vấn đề ý tưởng đang giải quyết là gì?
Problem Statement - Which problem is your idea trying to solve?

Vietnamese: Dự án giải quyết 3 vấn đề nhức nhối trong ngành du lịch hiện tại:

1. **Phân bổ doanh thu bất bình đẳng:** Doanh thu du lịch phần lớn chảy vào túi các công ty lữ hành lớn (Large Operators), trong khi người dân địa phương - những người trực tiếp gìn giữ văn hóa - lại nhận được rất ít lợi ích kinh tế.

2. **Khát khao trải nghiệm nguyên bản:** Du khách quốc tế đang chán ngán các "tour công nghiệp" và gặp khó khăn trong việc tìm kiếm các không gian văn hóa thực chất, ẩn sâu trong các khu dân cư (hyper-local).

3. **Rào cản công nghệ & ngôn ngữ:** Các nghệ nhân, người dân địa phương thiếu công cụ (ứng dụng RSVP dễ dùng) và không rành ngoại ngữ để tự tiếp cận, quảng bá và giao tiếp với khách quốc tế.

English: The project solves 3 major pain points in the tourism ecosystem:

1. **Unequal Wealth Distribution:** Tourism revenue is monopolized by large operators and generic travel agencies, bypassing the actual local communities and artisans who host these cultures.

2. **The Craving for Authenticity:** International tourists struggle to find genuine, uncommercialized cultural experiences (hyper-local workshops) outside of standard tourist traps.

3. **The Tech & Language Barrier:** Local residents possess rich cultural knowledge but lack the technological tools (easy RSVP systems) and foreign language skills to market their workshops and communicate with global visitors.

20. Target Audience - Ý tưởng mong muốn giải quyết vấn đề của những đối tượng nào?
Target Audience - Whose problem is your idea trying to solve?

Vietnamese: Dự án kiến tạo một hệ sinh thái ba bên (Tripartite Ecosystem):

1. **Người dân địa phương (Local Hosts):** Những cá nhân có kỹ năng văn hóa truyền thống muốn trở thành đại sứ văn hóa để kiếm thêm thu nhập một cách chủ động.

2. **Du khách (International & Domestic Tourists):** Những người đam mê khám phá văn hóa bản địa chân thực, muốn tìm hiểu cuộc sống đời thường và trực tiếp đóng góp vào kinh tế địa phương (Eco-tourism).

3. **Hướng dẫn viên tự do (Freelance Tour Guides):** Những người cần một "Bản đồ văn hóa" (Cultural Map) để làm phong phú thêm lịch trình tour cá nhân hóa của họ, giúp họ kết nối khách hàng với các workshop độc đáo.

English: Our platform serves a tripartite ecosystem:

1. **Local People & Artisans (Hosts):** Everyday citizens who want to monetize their heritage, become cultural ambassadors, and improve their livelihoods.

2. **Tourists (Audience):** International and domestic travelers seeking authentic, grassroots cultural immersion (Eco-tourism) rather than commercialized sightseeing.

3. **Freelance Tour Guides:** Independent guides who can utilize our "Cultural Map" to curate highly unique, customized itineraries for their clients by discovering localized workshops.

21. Competition - Các ý tưởng/giải pháp tương tự trên thị trường (tại Việt Nam và quốc tế)
Competition - Is there any similar ideas/solutions in the market (in Vietnam and International)

Vietnamese:

- **Trên thế giới:** Luma, Meetup. (Họ là các nền tảng tạo sự kiện chung chung, quy mô toàn cầu nhưng thiếu chiều sâu văn hóa, không có Bản đồ văn hóa/GIS và không giải quyết bài toán rào cản ngôn ngữ bằng AI). Airbnb Experiences có mô hình tương tự nhưng thu phí hoa hồng rất cao và có rào cản gia nhập lớn đối với người dân bình thường.

- **Tại Việt Nam:** Tubudd. (Tập trung vào mô hình thuê "người đồng hành/Local Buddy" để dẫn đi chơi theo giờ, chứ không tập trung vào việc tạo ra các "Workshop Kỹ năng Văn hóa" cụ thể do người dân làm chủ).

- **Lợi thế cạnh tranh (Our Unfair Advantage):** Không giống như các nền tảng chung chung, dự án của chúng tôi **tập trung độc quyền vào việc trao quyền (empowering) cho cộng đồng địa phương**. Sự kết hợp giữa **Cultural Map** (định vị không gian văn hóa) và **LangChain RAG AI** (phá vỡ rào cản ngôn ngữ) tạo ra một sản phẩm công nghệ sinh ra dành riêng cho thị trường du lịch sinh thái bản địa (Eco-tourism), biến người dân bình thường thành "công dân toàn cầu" ngay tại nhà mình.

English:

- **Global Market:** Platforms like Luma and Meetup. (They focus on generic, global event registrations. They lack a hyper-local Cultural GIS Map, offer no tourism focus, and do not provide AI translation tools for cross-cultural events). Airbnb Experiences exists but charges high commissions and demands high digital literacy, excluding everyday locals.

- **Vietnam Market:** Tubudd. (Tubudd focuses on renting a "Local Buddy" to guide tourists around the city, rather than empowering residents to host specific, skill-based

cultural workshops at their own venues).

- **Our Competitive Edge:** While competitors focus globally or broadly, our project is laser-focused on **empowering local Vietnamese residents**. By combining a dynamic **Cultural Map** with **LangChain-powered RAG chatbots** (to bridge the language gap), we offer a specialized eco-tourism ecosystem. We don't just register events; we give locals the exact tools they need to overcome language barriers and host global citizens in their own backyards.

Idea: Viebie - Community-Driven Cultural Mapping & Eco-Tourism

Tourism often benefits large operators while bypassing the actual communities that host them.

- **The Concept:** A platform that empowers local residents to become cultural ambassadors, directly connecting them with international visitors for authentic, hyper-local tours.

- **The Tech:** A scalable web application featuring robust user and guide registration, geographic cultural mapping (using SQLite for rapid local deployment or PostgreSQL for scale), and LangChain-powered RAG chatbots to bridge language barriers.

- **Theme Alignment:** It transforms local residents into "glocal" citizens who share their heritage with the world, providing sustainable livelihood opportunities while preserving local culture.

Hosts -> Authentication, QC -> create events -> Audience -> register for events

Entry:
KaKa Le wants to teach how to make **che ->** He registers at our application.

-> QC (You go and Check) {we need to discuss with the mentor}

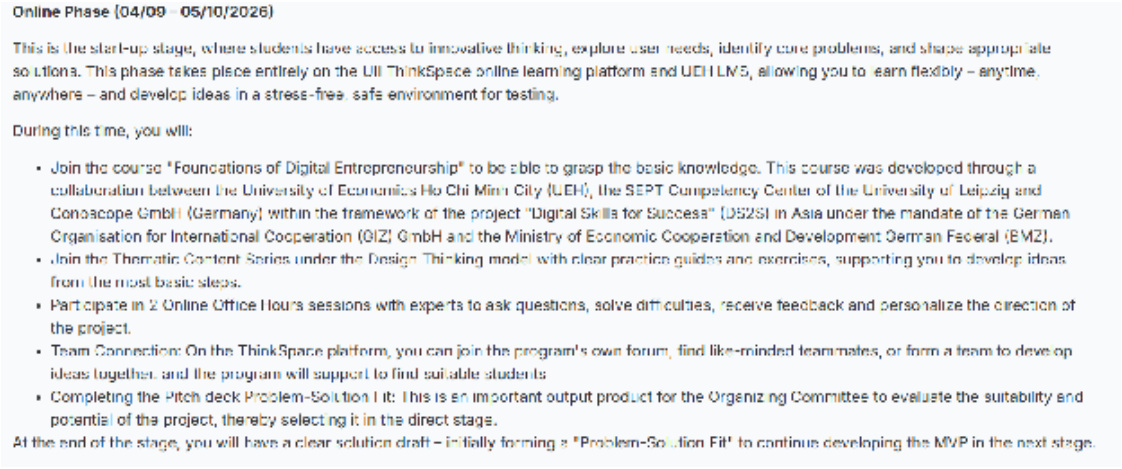

1. Creates events on our application ("how to make vietnamese Che")...

2. Audience will register the event

3. The audience will rate it for future customers**.**

-> RSVP system + Social media -> ***Domain: Cutural - Local + Tourists -> AirBNB***
Output: RSVP Application

You can integrate it with My previous project: Cultural Map
Display destinations
Hire tourguides -> Also need QC
Host workshops , AirBNB for cultures

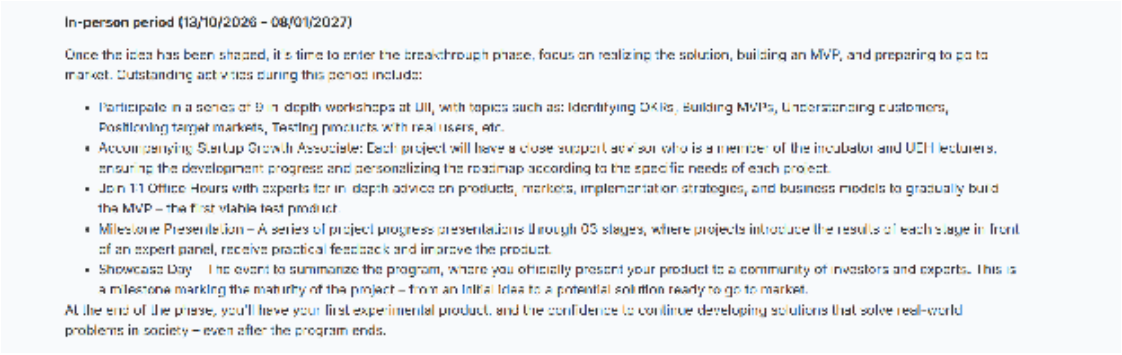

Online Phase (04/09 - 05/10/2026)

This is the start-up stage, where students have access to innovative thinking, explore user needs, identify core problems, and shape appropriate solutions. This phase takes place entirely on the UII ThinkSpace online learning platform and UEH LMS, allowing you to learn flexibly – anytime, anywhere – and develop ideas in a stress-free, safe environment for testing.

During this time, you will:

- Join the course "Foundations of Digital Entrepreneurship" to be able to grasp the basic knowledge. This course was developed through a collaboration between the University of Economics Ho Chi Minh City (UEH), the SEPT Competency Center of the University of Leipzig and Conscape GmbH (Germany) within the framework of the project "Digital Skills for Success" (DS2S) in Asia under the mandate of the German Organisation for International Cooperation (GIZ) GmbH and the Ministry of Economic Cooperation and Development German Federal (BMZ).
- Join the Thematic Content Series under the Design Thinking model with clear practice guides and exercises, supporting you to develop ideas from the most basic steps.
- Participate in 2 Online Office Hours sessions with experts to ask questions, solve difficulties, receive feedback and personalize the direction of the project.
- Team Connection: On the ThinkSpace platform, you can join the program's own forum, find like-minded teammates, or form a team to develop ideas together, and the program will support to find suitable students.
- Completing the Pitch deck Problem-Solution Fit: This is an important output product for the Organizing Committee to evaluate the suitability and potential of the project, thereby selecting it in the direct stage.

At the end of the stage, you will have a clear solution draft – initially forming a "Problem-Solution Fit" to continue developing the MVP in the next stage.

In-person period (13/10/2026 – 08/01/2027)

Once the idea has been shaped, it's time to enter the breakthrough phase, focus on realizing the solution, building an MVP, and preparing to go to market. Outstanding activities during this period include:

- Participate in a series of 5 in-depth workshops at UII, with topics such as: Identifying OKRs, Building MVPs, Understanding customers, Positioning target markets, Testing products with real users, etc.
- Accompanying Startup Growth Associate: Each project will have a close support advisor who is a member of the incubator and UEH lecturers, ensuring the development progress and personalizing the roadmap according to the specific needs of each project.
- Join 11 Office Hours with experts for in-depth advice on products, markets, implementation strategies, and business models to gradually build the MVP – the first viable test product.
- Milestone Presentation – A series of project progress presentations through 03 stages, where projects introduce the results of each stage in front of an expert panel, receive practical feedback and improve the product.
- Showcase Day – The event to summarize the program, where you officially present your product to a community of investors and experts. This is a milestone marking the maturity of the project – from an initial idea to a potential solution ready to go to market.

At the end of the phase, you'll have your first experimental product, and the confidence to continue developing solutions that solve real-world problems in society – even after the program ends.

Dear UII Sandbox 2026 Selection Committee,

We, the VieBee team, are writing to express our strong desire and readiness to advance to the **In-person Phase: Intensive Incubation** with our project, VieBee. Over the past few weeks, our team has dedicated ourselves to building a solution for a peer-to-peer experiential travel platform that bridges the gap between international travelers and grassroots local hosts. We view the UII Sandbox not just as an incubator, but as the ideal ecosystem to transform this vision into a tangible solution.

Understanding the Mission of UII Sandbox 2026

We deeply resonate with the mission of “Empowering Glocal Citizens - Co-creating Innovation for a Sustainable Future.” To us, being “Glocal Citizens” means recognizing a global trend, the massive shift toward authentic, experiential travel while addressing a highly localized challenge: the digital divide and language barriers that prevent Vietnamese artisans, home cooks, and craftspeople from participating in this economy. VieBee embodies this mission by routing tourism revenue directly into the pockets of working-class locals, effectively minimizing tourism economic leakage. We understand that Sandbox 2026 is designed as a safe, collaborative space to move applied research and technology beyond the academic setting. By utilizing AI to create meaningful community impact, we are fully aligned with the program’s core philosophy of co-creating lasting social value.

Reflection on the Online Phase Experience

The Idea-to-Prototype pathway during the Online Phase has been transformative for our team. Through the guided frameworks on UII ThinkSpace and the UEH LMS, we successfully navigated the Design Thinking process to truly understand our dual-sided market. The

structured exercises forced us to confront our assumptions and narrow our focus. Instead of building a generic travel app, we identified the specific friction points-trust and communication which led to the conceptualization of our real-time AI translation copilot and the "zero-tech" host portal. Culminating this phase by developing our Problem-Solution Fit pitch deck gave us a crystal-clear roadmap for the exact value we bring to both international guests and local hosts.

Our Passion for Entrepreneurship, Innovation, and VieBee

Our team is driven by the conviction that technology should empower, not exclude. We are passionate about the intersection of digital entrepreneurship and cultural preservation. With VieBee, we are innovating how cultural exchange happens. We are incredibly energized by the challenge of integrating LangChain RAG AI to solve real-time, context-aware translation, and deploying a GIS-based Cultural Map to highlight hidden micro-experiences. For us, entrepreneurship is about building sustainable solutions that simultaneously solve a pressing societal problem, ensuring that the people who safeguard our cultural heritage are the ones who profit from it.

Expectations for the In-person Phase: Intensive Incubation

Moving into the intensive incubation phase, our primary expectation is to transition from a validated concept to the Minimum Viable Product (MVP). We are eager to participate in the 9 specialized workshops to sharpen our OKRs, refine our target-market positioning, and execute rigorous real-user product testing. We look forward to working closely with our assigned Startup Growth Associate (SGA), industry experts, and UEH faculty to stress-test our solution. By Showcase Day, we aim to have a functional, tested MVP and initial traction metrics that prove our technological viability and market demand.

Commitment to Continuing the Project

We view the UII Sandbox not as the finish line, but as the initial launchpad for VieBee. Our team is fully committed to seeing this project through, scaling it beyond the incubation period, and preparing for future external investment. We are ready to dedicate the time, resilience, and collaborative effort required to turn our initial prototype into a fully realized platform that redefines sustainable tourism in Vietnam and beyond.

Thank you for considering our application. We are excited about the possibility of walking this journey alongside the UII Sandbox community!

Sincerely,
VieBee Team
Due: Monday, 5 October 2026, 11:59 PM
Your submission should include the following sections:

1. **Identified Market Segments:** Clearly describe **distinct potential market segments** for your business idea, using a combination of segments bases characteristics.

2. **Chosen Target Segment:** From your identified segments, select the **primary target segments** that your business idea will initially focus on.

3. **Target Segment Justification:** Provide a brief explanation (1-2 paragraphs) for why you chose this specific segment, addressing its attractiveness (e.g., size, need,

accessibility) and its fit with your business idea and team capabilities.

4. **Market Size Estimation:** using the Tam-Sam-Som framework

5. **Key Insights & Assumptions**

Submission Requirements:

Link: Milestone 1

- ***You may submit it as a presentation (PDF/Slides) or structured document. Visuals (tables, personas, graphs) are encouraged.***

- Submit your work via a **Google Drive link** and ensure that **viewing access is enabled for the Organizing Committee**.

- **Only one representative from each project/team is required to submit** on behalf of the entire team.

Submission should include the following sections:
1. Identified Market Segments: Clearly describe distinct potential market segments for your business idea, using a combination of segments bases characteristics.

Geographic, demographic, psychographic and behavioral segmentation.

Segment	Geography	Demographics	Psychographics	Behavior
Independent international cultural explorers	Major Vietnamese tourist destinations	20-45, solo/couple/small groups	Curious, culturally motivated, values authenticity	Searches online, books activities, prefers flexible experiences
Domestic experiential travelers	Major cities + cultural destinations	18-40	Social, curious, experience-oriented	Weekend trips, short activities, social sharing
Family & educational travelers	Cultural/ tourism destinations	Parents 28-50 + children	Learning-oriented, family bonding	Books structured activities in advance
Local hosts & artisans	Heritage neighborhoods, craft villages, communities	Adults with cultural skills/knowledge	Proud of local culture, income-oriented, community-minded	Currently rely on word-of-mouth/social media
Freelance tour guides	Tourist cities nationwide	Professional/ independent guides	Personalization-oriented	Need flexible activities to add to itineraries

Segment	Geography	Demographics	Psychographics	Behavior
Tourism partners	Hotels, hostels, cultural organizations	B2B	Service-oriented	Refer guests to external activities

The most important segmentation insight

There are really **two markets that must be solved together**:

-> Demand: Travelers looking for authentic experiences
-> **Supply:** Locals capable of delivering those experiences

This is important because VieBee is a ***marketplace***, not simply a travel-content app.

2. Chosen Target Segment: From your identified segments, select the primary target segments that your business idea will initially focus on.
Primary Demand Segment: Independent international travelers seeking authentic cultural experiences

Initial profile:

Travelers aged approximately **20-45**, visiting Vietnam independently or in small groups, digitally comfortable, interested in food/crafts/local culture, and willing to pay for short, hands-on experiences.

Primary Supply Segment: Local hosts and artisans in culturally rich urban communities

Especially:

1. Home cooks
2. Artisans
3. Craft workers
4. Family businesses
5. People possessing traditional cultural skills

Initial geographic beachhead

Recommend:

Ho Chi Minh City first, followed by Hoi An, Hue and Hanoi.

Vietnam's tourism authority has identified Ho Chi Minh City, Hanoi, Da Nang, Phu Quoc, Nha Trang, Hoi An, Vung Tau, Da Lat, Phan Thiet and Hue among the Vietnamese destinations most searched by international travelers, giving several of these cities a clear discovery/tourism base for future expansion.

3. Target Segment Justification: Provide a brief explanation (1-2 paragraphs) for why you chose this specific segment, addressing its attractiveness (e.g., size, need, accessibility) and its fit with your business idea and team capabilities.

VieBee should initially focus on independent international travelers because this segment has a clear need for discoverable, bookable cultural experiences and already demonstrates willingness to use digital tools during travel. Vietnam received nearly 21.2 million international visitors in 2025, and the market continued growing in 2026, with 15.9 million arrivals during the first eight months of the year. This segment also has a strong fit with VieBee's capabilities because the proposed solution directly addresses the problems they encounter: discovering hyper-local experiences, understanding unfamiliar cultural contexts, communicating with hosts, and booking activities conveniently. On the supply side, starting with digitally assisted local hosts allows VieBee to build a focused inventory of experiences before expanding to additional cities and traveler groups.

4. Market Size Estimation: using the Tam-Sam-Som framework

We estimate the annual GMV opportunity for paid local cultural experiences.

Assumptions

For a base-case estimate:

Assumption	Base case
2025 international tourist arrivals	**21.2M**
2025 domestic tourist trips	**135.5M**
Total travel occasions	**156.7M**
Estimated share interested in a paid cultural/experiential activity	**30%***
Average experience price	**VND 450,000**
Average paid experience frequency	**1 experience / travel occasion**

***30% is a working assumption, not an official statistic.** This should be validated through customer interviews/surveys.

Official tourism data supports the underlying visitor volumes: approximately 21.2M international visitors in 2025 and approximately 135.5M domestic tourist trips.

TAM: **All domestic + international travel occasions in Vietnam**

Formula: 156.7M × 30% × VND 450,000

TAM ≈ VND 21.15 trillion / year

This represents the theoretical annual GMV opportunity if 30% of travel occasions generated one paid VieBee-type experience.

SAM: **Our initial focus is international travelers**.

Formula: 21.2M × 30% × VND 450,000

SAM ≈ VND 2.86 trillion / year

This is the estimated annual GMV among international visitors who could be interested in the type of cultural experience VieBee provides.

SOM: Three-year target:

50,000 paid bookings / year

At VND 450,000 per experience:

50,000 × VND 450,000

SOM target ≈ VND 22.5 billion GMV / year

That is approximately **0.79% of the estimated SAM**.

At a hypothetical 12% platform take rate:

VND 22.5B × 12%

≈ VND 2.7 billion annual platform revenue

Again, present the 50,000-booking figure as an **execution target**, not a prediction.

5. Key Insights & Assumptions

Key insights

1. The market is large, but VieBee should start narrow.

Vietnam's tourism volume is already significant, with 21.2M international visitors and roughly 135.5M domestic trips in 2025.

2. The marketplace has a two-sided acquisition problem.

Traveler demand alone is insufficient. VieBee must simultaneously build a sufficiently attractive supply of local experiences.

3. Authenticity can be a meaningful differentiator.

Research involving Vietnamese tourists has highlighted authenticity, cultural engagement and community interaction as important parts of cultural tourism experiences.

4. Existing competition validates the category.

Airbnb already offers cooking, cultural tours, tastings and hands-on workshops in Vietnam, while Tubudd offers local-buddy services.

The opportunity is therefore not necessarily to create demand for "local experiences" from zero, but to create a **more specialized community-heritage marketplace**.

Key assumptions to validate

Assumption	Why it matters	How to validate
30% of travelers are interested in paid cultural experiences	Drives TAM/SAM	Online traveler survey
Average experience price = ₫450K	Drives market value	Competitor + host interviews
Travelers trust community-hosted experiences	Critical for conversion	Prototype testing
Hosts can create workshops with minimal assistance	Critical for supply	Host interviews/pilot
AI translation reduces communication friction	Core feature hypothesis	Prototype test
Hosts are willing to pay/accept 10-15% commission	Determines business model	Host interviews
50K bookings/year is operationally achievable	SOM target	Pilot → city expansion metrics

Submission
Google drive link:

- You may submit it as a presentation (PDF/Slides) or structured document. Visuals (tables, personas, graphs) are encouraged.
- Submit your work via a Google Drive link and ensure that viewing access is enabled for the Organizing Committee.
- Only one representative from each project/team is required to submit on behalf of the entire team.

Due: Monday, 5 October 2026, 11:59 PM
Your submission should include the following sections:

1. **Identified User Persona:** you will need to do this first and then do the empathy map
2. **Complete Empathy Map:** From your user persona, make the empathy map
3. **Key Insights & Assumptions:** Pick at least 3 insight

Submission Requirements:

Link: Milestone 2

- ***You may submit it as a presentation (PDF/Slides) or structured document. Visuals (tables, personas, graphs) are encouraged.***

- Submit your work via a **Google Drive link** and ensure that **viewing access is enabled for the Organizing Committee**.

- **Only one representative from each project/team is required to submit** on behalf of the entire team.

Due: Monday, 5 October 2026, 11:59 PM
Your submission should include the following sections:

1. **Analyze the Root Cause of a Problem:** Using ONE of the tool provided to identify the root cause of the problem

2. **Create a clear and concise Problem Statement:** From the root cause analysis, craft a problem statement using the provided template.

3. **Key Insights & Assumptions**

Submission Requirements:

- ***You may submit it as a presentation (PDF/Slides) or structured document. Visuals (tables, personas, graphs) are encouraged.***

- Submit your work via a **Google Drive link** and ensure that **viewing access is enabled for the Organizing Committee**.

- **Only one representative from each project/team is required to submit** on behalf of the entire team.

VieBee - Milestone 3

1. Analyzing the Root Cause of the proposed problem

We will use the 5 whys framework to address the proposed problem. The observable problem we are having right now are:

1. International Tourists struggle to find hidden, genuine and uncommercialized local experience.

2. Local artisans, and people cannot extract their full potential to make profits from the tourism industry.

Illustration 1: Tourists struggling on finding unique experiences

Our Addresses

Why #1: Why do tourists struggle to find these **reliable** authentic, grassroots cultural experiences?

- Because local artisans and residents do not actively promote or offer these micro-experiences to international visitors online.
- Because the lack of transparency between hosts and tourists makes it difficult to build trust.

Why #2:Why don't local people promote their cultural knowledge and skills to tourists?

- Because most of the local people lack foreign language skills and digital knowledge such as digital marketing, etc.

Why #3: Why are language skills and technology a barrier for them?

- Because current platforms are only for a subset of people who have a good digital knowledge, most local people lack the motive, information to access those applications to start their journey.

Why #4: Why do existing platforms have high barriers?

- Platforms like Airbnb Experiences charge high commissions (around 20%) and demand high digital literacy, while general event platforms like Luma or Meetup lack tourism focus and AI translation tools for cross-cultural communication.

Root Cause Insight: The root cause is the absence of an accessible, reliable and highly reachable platform equipped with automated translation and a geographic cultural map, preventing digitally inexperienced locals from overcoming the friction of hosting and

communicating with foreign travelers and vice versa , promoting mutual profit and strengthening trust between participating entities.

2. Problem Statement

Following this guideline, *[User] needs [the user's key need], because [insight or underlying reason]* , we have crafted a problem statement for each of two sides: hosts and tourists.

For the Demand Side (Travelers): Independent international travelers need a way to easily discover and book authentic, small-scale cultural micro-experiences, because they are craving genuine cultural immersion but currently lack trustworthy ways to find and communicate with grassroots local hosts outside of commercialized tourist traps.

For the Supply Side (Local Hosts): Local people and artisans need a low-friction digital tool with translation support to manage RSVPs and host cultural workshops, because they want to monetize their cultural heritage directly but lack the technical skills and foreign language proficiency to access the global tourist market.

3. Key Insights & Assumptions

Key Insights:
Insight #1: There is unequal wealth distribution in the current tourism model; revenue is monopolized by large operators, bypassing the local communities and artisans who actually preserve the culture.

Insight #2: Language and trust create the primary friction points for community-based tourism; tourists hesitate to visit unfamiliar homes, and locals feel uncomfortable communicating with foreigners.

Insight #3: While competitors like Tubudd focus on renting personal local guides, and Airbnb focuses on broad experiences, there is a clear market gap for a platform specifically designed around skill-based cultural workshops and living heritage mapping.

Key Assumptions:
-> An AI Cultural Copilot (utilizing LangChain + RAG) will effectively reduce communication friction and language barriers between travelers and hosts.

-> Local hosts can successfully create workshops, set capacities, and manage RSVPs with minimal technical assistance if the tool provided is simple enough.

-> International travelers will trust community-hosted experiences if they are backed by community verification, reviews, and platform moderation.

All problems that we discussed

Competitors

1. Luma
2. Meetup

What differs from the competitors

VieBee - Milestone 3

1. Analyzing the Root Cause of the proposed problem

We will use the 5 whys framework to address the proposed problem. The observable problem we are having right now are:

1. International Tourists struggle to find hidden, genuine and uncommercialized local experience.
2. Local artisans, and people cannot extract their full potential to make profits from the tourism industry.

Illustration 1: Tourists struggling on finding unique experiences

Our Addresses

Why #1: Why do tourists struggle to find these **reliable** authentic, grassroots cultural experiences?

- Because local artisans and residents do not actively promote or offer these micro-experiences to international visitors online.
- Because the lack of transparency between hosts and tourists makes it difficult to build trust.

Why #2:Why don't local people promote their cultural knowledge and skills to tourists?

- Because most of the local people lack foreign language skills and digital knowledge such as digital marketing, etc.

Why #3: Why are language skills and technology a barrier for them?

- Because current platforms are only for a subset of people who have a good digital knowledge, most local people lack the motive, information to access those applications to start their journey.

Why #4: Why do existing platforms have high barriers?

- Platforms like Airbnb Experiences charge high commissions (around 20%) and demand high digital literacy, while general event platforms like Luma or Meetup lack tourism focus and AI translation tools for cross-cultural communication.

Root Cause Insight: The root cause is the absence of an accessible, reliable and highly reachable platform equipped with automated translation and a geographic cultural map, preventing digitally inexperienced locals from overcoming the friction of hosting and

communicating with foreign travelers and vice versa , promoting mutual profit and strengthening trust between participating entities.

2. Problem Statement

Following this guideline, *[User] needs [the user's key need], because [insight or underlying reason]* , we have crafted a problem statement for each of two sides: hosts and tourists.

For the Demand Side (Travelers): Independent international travelers need a way to easily discover and book authentic, small-scale cultural micro-experiences, because they are craving genuine cultural immersion but currently lack trustworthy ways to find and communicate with grassroots local hosts outside of commercialized tourist traps.

For the Supply Side (Local Hosts): Local people and artisans need a low-friction digital tool with translation support to manage RSVPs and host cultural workshops, because they want to monetize their cultural heritage directly but lack the technical skills and foreign language proficiency to access the global tourist market.

3. Key Insights & Assumptions

Key Insights:

Insight #1: There is unequal wealth distribution in the current tourism model; revenue is monopolized by large operators, bypassing the local communities and artisans who actually preserve the culture.

Insight #2: Language and trust create the primary friction points for community-based tourism; tourists hesitate to visit unfamiliar homes, and locals feel uncomfortable communicating with foreigners.

Insight #3: While competitors like Tubudd focus on renting personal local guides, and Airbnb focuses on broad experiences, there is a clear market gap for a platform specifically designed around skill-based cultural workshops and living heritage mapping.

Key Assumptions:

-> An AI Cultural Copilot (utilizing LangChain + RAG) will effectively reduce communication friction and language barriers between travelers and hosts.

-> Local hosts can successfully create workshops, set capacities, and manage RSVPs with minimal technical assistance if the tool provided is simple enough.

-> International travelers will trust community-hosted experiences if they are backed by community verification, reviews, and platform moderation.

Due: Monday, 5 October 2026, 11:59 PM
Your submission should include the following sections:

1. **Concept Statement:** Clearly describes your idea, includes all of the main points and scope of the business as well the Product/ Service Offerings

2. **3-5 prioritized Hypotheses**

3. **Key Insights & Assumptions**

Submission Requirements:

- ***You may submit it as a presentation (PDF/Slides) or structured document. Visuals (tables, personas, graphs) are encouraged.***

- Submit your work via a **Google Drive link** and ensure that **viewing access is enabled for the Organizing Committee**.

- **Only one representative from each project/team is required to submit** on behalf of the entire team.

VieBee - Milestone 4

1. Concept Statement

For independent international travelers visiting Vietnam who struggle to access authentic, non-commercialized cultural activities due to discovery and language barriers, **VieBee** is a peer-to-peer living heritage marketplace that enables travelers to discover and book grassroots cultural micro-workshops via a dynamic GIS Cultural Map and real-time AI translation. Unlike mass-market tour platforms (Airbnb Experiences) or generic event apps (Luma, Meetup), it focuses exclusively on neighborhood living heritage with a community-friendly take rate (**10-15%**) and an in-situ AI Cultural Copilot that eliminates communication barriers for non-English speaking hosts.

2. Product Offering & Feature-to-Problem Fit Core Unique Selling Proposition (USP)

VieBee bridges the grassroots tourism divide by combining hyper-local GIS mapping with a grounded AI Cultural Copilot (LangChain + RAG), allowing everyday residents with zero technical or English skills to host international guests seamlessly.

Feature-to-Problem Fit Table

Feature	Problem Solved	Description
Dynamic GIS Cultural Map	Travelers cannot discover micro-experiences tucked away in local alleys and residential areas.	A location-based discovery map displaying nearby artisans, home kitchens, craft spaces, and cultural traditions by proximity.
Lightweight Workshop RSVP & Listing Tool	Artisans lack digital marketing skills and cannot manage complex booking/calendar software.	A simplified 3-step listing flow where hosts set date, time slots, and guest limits without needing technical expertise.
AI Cultural Copilot (LangChain + RAG)	Severe language barriers and lack of cultural context between foreign guests and local hosts.	Two-way automated messaging translation combined with contextual guidance on local customs, ingredients, and etiquette grounded in verified workshop data.
Community Verification & QC System	Foreigners fear unsafe/unvetted locations; hosts fear disruptive or disrespectful guests.	Identity validation, peer moderation, photo verification of workshop spaces, and bi-directional

Feature	Problem Solved	Description
		community reviews.
Automated Cashless Escrow Payouts	Currency friction, physical cash awkwardness, and predatory intermediaries capturing revenue.	International payment gateway integration that holds payments securely and disburses funds directly to local host bank accounts/e-wallets at a low 10-15% commission.

3. Prioritized Testable Hypotheses

Hypothesis 1: Problem Hypothesis (Communication & Discovery Friction)

- **Hypothesis:** At least 65% of surveyed independent international travelers identify "inability to communicate with hosts" and "lack of transparent discovery outside tourist traps" as their top two deterrents to booking grassroots Vietnamese cultural activities.
- **Testing Method:** Structured survey and 20 in-depth interviews with independent backpackers and boutique travelers in District 1 and District 3, Ho Chi Minh City.
- **Success Metric:** ≥ 65% rate these two barriers as a 4 or 5 on a 5-point friction scale.

Hypothesis 2: Solution Hypothesis (AI Translation & Workshop Usability)

- **Hypothesis:** Using the AI Cultural Copilot, non-English-speaking hosts and international travelers can conduct a 90-minute hands-on workshop (e.g., cooking traditional *chè*) with an overall communication satisfaction score of ≥ 4.2/5.0, without requiring an on-site bilingual tour guide.
- **Testing Method:** Run a live prototype test with 5 foreign travelers and 2 non-English speaking artisans using a guided WhatsApp/Web-based RAG translation bot.
- **Success Metric:** ≥ 80% of user interactions completed without human intervention; average rating ≥ 4.2/5.0.

Hypothesis 3: Price & Revenue Hypothesis (Commission & Perceived Value)

- **Hypothesis:** International travelers will convert at a price point of VND 400,000 - VND 500,000 (16-20) per 2-hour micro-workshop, and at least 80% of recruited local hosts will accept a 12% platform take rate over Airbnb's standard ~20% fee.
- **Testing Method:** Landing page test with mock bookings at VND 450,000 and direct onboarding interviews with 15 local craftspersons/home cooks.
- **Success Metric:** Landing page checkout intent ≥ 7%; ≥ 12 out of 15 hosts agree to list at a 12% commission.

Hypothesis 4: Go-to-Market Hypothesis (Hostel & Boutique Hotel Referrals)

- **Hypothesis:** Distributing localized, QR-coded "Cultural Map" tabletop stands across 10 partner boutique hotels and hostels in central Ho Chi Minh City will generate a minimum of 150 scanned sessions and a ≥ 5% workshop booking conversion rate within 21 days.

- **Testing Method:** Deploy branded physical collateral with custom UTM/referral QR codes at reception desks and lounges of 10 accommodation partners.

- **Success Metric:** ≥ 150 unique visitors, ≥ 8 confirmed workshop bookings.

4. Key Insights & Critical Assumptions

Insight #1: Grounded AI Over General Chatbots: Local hosts do not need an open-ended conversational bot; they need deterministic, fact-checked translations of ingredients, equipment, safety tips, and etiquette to avoid cultural misunderstandings.

Insight #2: Low-Tech Supply Onboarding is Essential: The primary operational bottleneck is host onboarding. The host interface must rely on familiar patterns (similar to Zalo or direct voice-to-text inputs) to prevent elderly artisans from abandoning the tool.

Insight #3: Community Endorsement Drives Guest Conversion: Because workshops take place in private residences and neighborhood spaces, visible trust markers (community validation badges, verified host ID, previous traveler reviews) are the single biggest driver of traveler checkout conversion.

I. Objectives

By the end of this submission, you will be able to clearly illustrate the idea, what does the product or service of the team offer and the hypothesis for the identified problem by

- **Define** a clear **Concept Statement** that captures the user, need, solution, benefit, and differentiation.

- **Identify** key Product Offering of the idea.

- **Translate** key assumptions of the problem into **Hypotheses**

II. Expected outcomes

Your submission should include the following sections:

1. **Concept Statement:** Clearly describes your idea, includes all of the main points and scope of the business as well the Product/ Service Offerings

2. **3-5 prioritized Hypotheses**

3. **Key Insights & Assumptions**

You may submit it as a presentation (PDF/Slides) or structured document. Visuals (tables, personas, graphs) are encouraged.

1. **Concept Statement**

For independent international travelers and local Vietnamese artisans who face friction in discovering and monetizing authentic cultural experiences, VieBee is a peer-to-peer experiential travel marketplace that connects them directly through structured micro-workshops.

Unlike **Airbnb Experiences** (which demands high digital literacy and charges ~20% commission) or **Tubudd** (which focuses on renting personal local guides), VieBee empowers grassroots communities using a hyper-local GIS Cultural Map and a LangChain RAG AI Copilot to actively eliminate language barriers and technical friction.

Key Product Offerings:

- **GIS Cultural Map:** A dynamic, geographic discovery tool for travelers to locate nearby authentic workshops, artisans, food traditions, and cultural spaces instead of searching merely by category.

- **Micro-Workshop RSVP Marketplace:** A low-friction digital booking and capacity management tool allowing everyday locals to host and monetize skill-based experiences (e.g., traditional cooking, bamboo crafting, pottery).

- **AI Cultural Copilot:** A real-time, LangChain-powered translation and context assistant that bridges the language gap between travelers and hosts, providing etiquette tips, ingredient explanations, and Q&A support based on verified workshop knowledge.

- **Community Verification System:** A trust-building infrastructure combining identity verification, community validation, platform moderation, and peer reviews.

2. **Prioritized Hypotheses**

3. **Technical/UX Hypothesis:** An AI Cultural Copilot utilizing LangChain + RAG will effectively reduce communication friction and language barriers, allowing non-English speaking locals to comfortably host international tourists.

4. **Supply-Side Hypothesis:** Local artisans, home cooks, and community members can successfully create workshop listings, set capacities, and manage RSVPs with minimal

technical assistance if the host-side UI is sufficiently simplified.

5. **Demand-Side Market Hypothesis:** A significant portion of independent international travelers (estimated at 30% of the target SAM) are willing to book and pay an average of 450,000 VND for short, community-hosted cultural micro-experiences.

6. **Business Model Hypothesis:** Local hosts are willing to accept a 10-15% transaction commission per successful booking in exchange for access to the global tourist market and automated translation support.

7. **Key Insight & Assumptions**

   Key Insight:

- **Insight 1:** There is unequal wealth distribution in the current tourism model; revenue is monopolized by large travel operators, bypassing the grassroots communities and artisans who actually preserve the living culture.

- **Insight 2:** Language barriers and a lack of mutual trust are the primary friction points for community-based tourism; tourists hesitate to visit unfamiliar local homes, while locals feel uncomfortable communicating with foreigners.

- **Insight 3:** There is a distinct market gap; global event platforms (Luma, Meetup) lack specialized tourism and AI translation features, while direct competitors (Tubudd, Airbnb) do not specifically focus on skill-based cultural heritage mapping for digitally inexperienced locals.

  Core Assumptions:

- International travelers will trust grassroots, community-hosted experiences if they are backed by rigorous community verification, platform moderation, and reviews.

- The initial geographic beachhead of Ho Chi Minh City, followed by Hoi An, Hue, and Hanoi, will provide a sufficient density of both cultural hosts and international travelers to validate the MVP.

VieBee - Milestone 4

1. Concept Statement

For independent international travelers visiting Vietnam who struggle to access authentic, non-commercialized cultural activities due to discovery and language barriers, **VieBee** is a peer-to-

peer living heritage marketplace that enables travelers to discover and book grassroots cultural micro-workshops via a dynamic GIS Cultural Map and real-time AI translation. Unlike mass-market tour platforms (Airbnb Experiences) or generic event apps (Luma, Meetup), it focuses exclusively on neighborhood living heritage with a community-friendly take rate (**10-15%**) and an in-situ AI Cultural Copilot that eliminates communication barriers for non-English speaking hosts.

2. Product Offering & Feature-to-Problem Fit Core Unique Selling Proposition (USP)

VieBee bridges the grassroots tourism divide by combining hyper-local GIS mapping with a grounded AI Cultural Copilot (LangChain + RAG), allowing everyday residents with zero technical or English skills to host international guests seamlessly.

Due: Monday, 5 October 2026, 11:59 PM
Your submission should include the following sections:

1. **Customer Profile:** List the key Jobs (functional, social, emotional, supporting), Pains, and Gains of your chosen customer segment.

2. **Value Map:** Describe the main Products & Services, and map how they act as Pain Relievers and Gain Creators.

3. **Fit Analysis:** Show the connection between the Customer Profile and Value Map. Which specific Jobs, Pains, or Gains are directly addressed?

4. **Key Insights:** Reflect on why your value proposition is compelling for your chosen customer segment.

Submission Requirements:

- ***You may submit it as a presentation (PDF/Slides) or structured document. Visuals (tables, personas, graphs) are encouraged.***

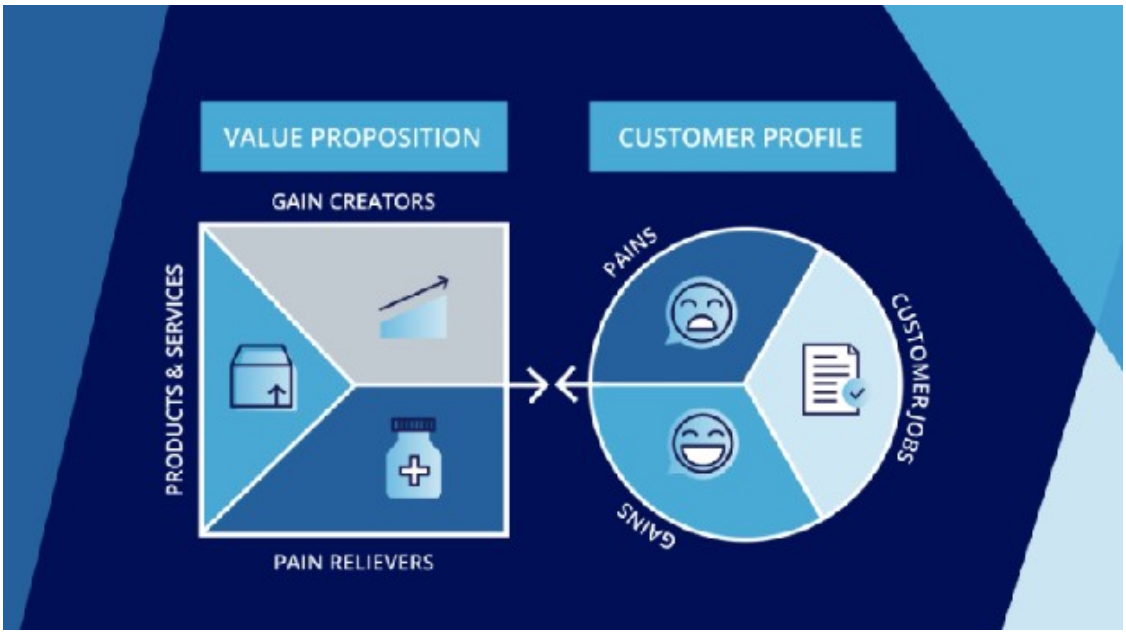

- Submit your work via a **Google Drive link** and ensure that **viewing access is enabled for the Organizing Committee**.

- **Only one representative from each project/team is required to submit** on behalf of the entire team.

VieBee - Milestone 5

1. Customer Profile

A. Primary Demand Segment: Independent International Travelers (Aged 20-45)
Travelers visiting Vietnam solo, as couples, or in small groups who value authenticity and book flexible activities digitally.

Customer Jobs:

1. **Functional Jobs:** Discover and book short, hands-on cultural activities (cooking, crafting, pottery) that fit flexibly into a travel itinerary; communicate with local hosts before and during the workshop; navigate to local neighborhood venues.

2. **Social Jobs:** Be seen as a mindful, culturally respectful traveler rather than a passive mass tourist; share unique, off-the-beaten-path stories and handmade crafts on social media or with friends.

3. **Emotional Jobs:** Experience genuine human connection with Vietnamese locals; feel safe, welcomed, and confident when entering an unfamiliar neighborhood or private home.

4. **Supporting Jobs:** Vet activity quality through reviews, verify host trustworthiness, and complete bookings/payments seamlessly online.

Pains (Obstacles & Risks):

Commercialized Tourist Traps: Mainstream platforms are dominated by generic mega-tours, bus tours, and souvenir shops rather than genuine grassroots micro-experiences.

Language & Etiquette Friction: Inability to speak Vietnamese creates anxiety about miscommunication, awkwardness, or accidentally offending local hosts.

Safety & Trust Hesitation: Uncertainty and hesitation around visiting an unverified stranger's home or tucked-away alley workshop.

Discovery Fragmentation: No centralized map showing hyper-local cultural workshops happening nearby in real time.

Gains (Desired Outcomes & Benefits):

-> **Hands-On Cultural Mastery:** Learning an authentic skill (e.g., brewing traditional *chè* or weaving bamboo) directly from a local practitioner.

-> **Frictionless Cross-Cultural Communication:** Understanding not just the literal words of the host, but the cultural stories, ingredients, and etiquette behind the craft.

-> **Meaningful Economic Impact:** Knowing their tourism spending goes directly into the pockets of local families and preserves community heritage.

B. Primary Supply Segment: Local Cultural Hosts & Artisans
Home cooks, elder artisans, tailors, potters, weavers, and family-run cultural spaces in heritage neighborhoods.
Customer Jobs:

1. **Functional Jobs:** Promote traditional skills/workshops to tourists; set workshop capacity and schedules; manage guest RSVPs; instruct foreign visitors during sessions; receive payouts reliably.

2. **Social Jobs:** Represent their neighborhood as proud cultural ambassadors and preserve generational family traditions.

3. **Emotional Jobs:** Feel confident and respected when hosting international guests without feeling embarrassed by a lack of English or tech skills.

4. **Supporting Jobs:** Register a profile, pass quality verification, and track booking schedules.

Pains (Obstacles & Risks):

Severe Language Barrier: Discomfort and inability to communicate workshop instructions or handle Q&A in English or other foreign languages.

High Digital Literacy Barriers: Existing global platforms (like Airbnb) are too complex for everyday locals and elder artisans to set up and manage independently.

Unfair Revenue Distribution & High Fees: Large tour operators monopolize tourist spending, while platforms like Airbnb Experiences charge steep ~20% host commissions.

Gains (Desired Outcomes & Benefits):

-> **Direct, Dignified Livelihood:** Earning supplemental income directly from their cultural knowledge with a fair, community-friendly take rate.

-> **Zero-Tech-Hassle Management:** A simple, intuitive tool to create events, cap guest numbers, and manage RSVPs in a few taps.

-> Pride in Heritage Preservation: Seeing younger generations and global visitors value and sustain their traditional crafts and recipes.

2. Value Map

Products & Services:
GIS-Based Cultural Map: An interactive, location-aware map showcasing verified cultural workshops, artisans, food traditions, and community spaces.
Micro-Workshop Marketplace & RSVP System: A streamlined two-sided booking engine for browsing, scheduling, capacity management, and RSVP tracking.
AI Cultural Copilot (LangChain + RAG): An integrated AI assistant providing bilateral real-time translation, workshop Q&A, and verified explanations of cultural etiquette, techniques, and stories.
Community Verification & QC Framework: Identity checks, on-the-ground quality control (QC), platform moderation, and two-way user reviews.
Pain Relievers (How VieBee Eases Customer Pains)

- **Replaces Tourist Traps with Vetted Micro-Workshops:** Filters out mass commercial tours to exclusively highlight small-scale, skill-based neighborhood experiences.

- **Eliminates Language & Cultural Anxiety via Grounded AI:** Translates traveler↔host conversations in real time and briefs travelers on local customs and workshop steps using host-verified RAG data.

- **Establishes Bilateral Trust & Safety:** Verifies host identities and conducts physical QC checks so travelers feel safe entering local homes and hosts feel secure welcoming guests.

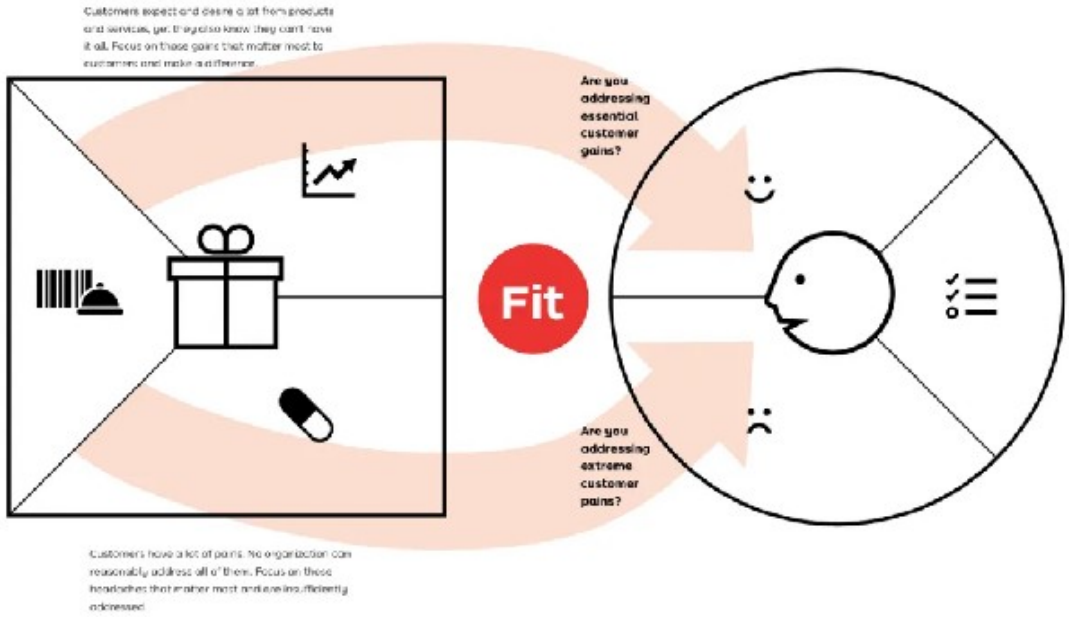

- **Removes Tech & Commission Friction for Locals:** Provides a lightweight host onboarding/RSVP interface requiring minimal digital literacy and charges a proposed **10-15% commission** (compared to Airbnb's ~20%).

Gain Creators
Answer the question: *"What can I experience around me?"* by letting travelers and freelance tour guides visually discover hidden neighborhood gems on the Cultural Map.

-> Uses the AI Cultural Copilot to share the history, ingredients, and personal heritage story behind every workshop, elevating a simple class into living heritage immersion.

-> Empowers everyday locals to become micro-entrepreneurs and keep 85-90% of their workshop earnings.

3. Fit Analysis (Customer Profile ↔ Value Map Connection)

The table below illustrates how VieBee's Value Map directly addresses the highest-priority Jobs, Pains, and Gains across both sides of the marketplace:

Target Segment	Customer Profile Element	VieBee Value Map Feature	Fit Outcome
Travelers (Demand)	Job: Find flexible, authentic activities nearby. Pain: Mainstream apps only show commercialized mega-tours.	GIS-Based Cultural Map & Micro-Workshop Marketplace: Visual location discovery focused strictly on small-group heritage skills.	Travelers discover tucked-away neighborhood workshops in minutes instead of booking generic bus tours.
Travelers & Hosts (Both)	Job: Communicate instructions and stories. Pain: Hosts don't speak English; travelers fear cultural faux pas.	AI Cultural Copilot (LangChain + RAG): Real-time translation + context on etiquette, ingredients, and techniques grounded in host data.	Seamless two-way interaction during workshops without needing to hire an expensive bilingual interpreter.
Travelers (Demand)	Job: Vet safety before visiting a local home. Pain: Hesitation/distrust	Community Verification & QC: Host ID verification, on-site quality	High booking conversion and peace of mind for solo and small-group

Target Segment	Customer Profile Element	VieBee Value Map Feature	Fit Outcome
	of unfamiliar residential venues.	checks, moderation, and transparent peer reviews.	international travelers.
Local Hosts (Supply)	Job: Manage bookings & earn fair income. Pain: Complex tech platforms and high (20%) commissions.	Lightweight Host RSVP Tool & 10-15% Take Rate: 3-step workshop creation, capacity limits, and community-friendly pricing.	Digitally inexperienced artisans can independently list workshops and retain 85-90% of tourism revenue.
Ecosystem (Guides/Cities)	Job: Build unique itineraries & diversify tourism. Gain: Sustainable preservation of intangible heritage.	Curated Living Heritage Network: B2B/Guide access to verified local artisans across urban neighborhoods.	Disperses tourist foot traffic beyond overcrowded landmarks and creates economic incentives to keep traditions alive.

4. Key Insights

Insight #1: Competitors like Airbnb Experiences or Tubudd require either high digital/language fluency from hosts or rely on paid third-party buddies. By pairing an ultra-simple RSVP tool with an AI Cultural Copilot, VieBee unlocks a massive, previously unreachable supply of authentic elder artisans and home cooks.

Insight #2: Independent travelers aged 20-45 prefer spontaneous, flexible micro-experiences over rigid full-day tours. Shifting discovery from text-based category lists to an interactive **GIS Cultural Map** directly aligns with how travelers explore neighborhoods on foot.

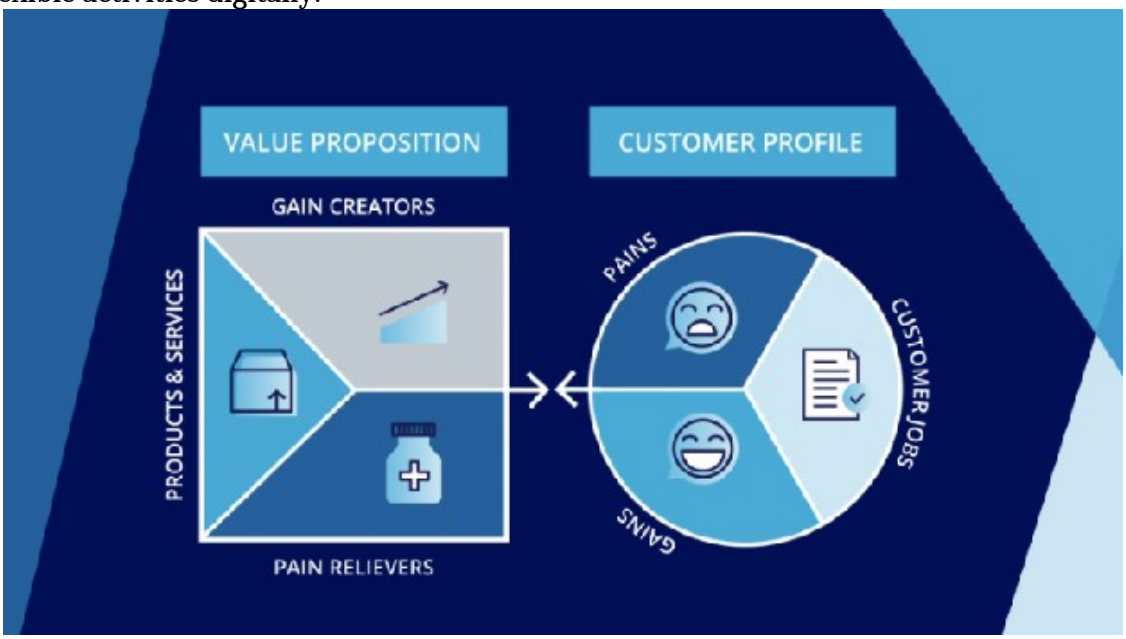

Insight #3: Because the AI Cultural Copilot uses Retrieval-Augmented Generation (RAG) grounded strictly in verified host knowledge, it acts as an invisible cultural bridge. It removes communication friction while keeping the authentic human warmth between the artisan and traveler front and center.

Insight #4: VieBee does not treat heritage preservation as a separate charity initiative. Every transaction directly increases household income for local culture-bearers, making intangible heritage economically self-sustaining.

VieBee - Milestone 5

	of unfamiliar residential venues.	checks, moderation, and transparent peer reviews.	international travelers.
Local Hosts (Supply)	Job: Manage bookings & earn fair income. Pain: Complex tech platforms and high (20%) commissions.	Lightweight Host RSVP Tool & 10-15% Take Rate: 3-step workshop creation, capacity limits, and community-friendly pricing.	Digitally inexperienced artisans can independently list workshops and retain 85-90% of tourism revenue.
Ecosystem (Guides/Cities)	Job: Build unique itineraries & diversify tourism. Gain: Sustainable preservation of intangible heritage.	Curated Living Heritage Network: B2B/Guide access to verified local artisans across urban neighborhoods.	Disperses tourist foot traffic beyond overcrowded landmarks and creates economic incentives to keep traditions alive.

4. Key Insights

Insight #1: Competitors like Airbnb Experiences or Tubudd require either high digital/language fluency from hosts or rely on paid third-party buddies. By pairing an ultra-simple RSVP tool with an AI Cultural Copilot, VieBee unlocks a massive, previously unreachable supply of authentic elder artisans and home cooks.

Insight #2: Independent travelers aged 20-45 prefer spontaneous, flexible micro-experiences over rigid full-day tours. Shifting discovery from text-based category lists to an interactive **GIS Cultural Map** directly aligns with how travelers explore neighborhoods on foot.

Insight #3: Because the AI Cultural Copilot uses Retrieval-Augmented Generation (RAG) grounded strictly in verified host knowledge, it acts as an invisible cultural bridge. It removes communication friction while keeping the authentic human warmth between the artisan and traveler front and center.

Insight #4: VieBee does not treat heritage preservation as a separate charity initiative. Every transaction directly increases household income for local culture-bearers, making intangible heritage economically self-sustaining.

Github organization: https://github.com/VieBee

Project Proposal
Vietnamese: VieBee - Khắc họa di sản, Nâng tầm cộng đồng
English: VieBee - Mapping Living Heritage, Empowering Communities
Project link: UEH UII SANDBOX 2026

Product Description:
VieBee is a peer-to-peer experiential travel platform connecting international travelers directly with grassroots local hosts. Powered by a GIS-based Cultural Map and real-time AI translation, it removes language barriers and enables ordinary locals to easily host and monetize authentic cultural workshops.

CTA: Discover Vietnam beyond the guidebooks through the people who live it.

Idea Description
1. The Problem
Vietnam offers a rich range of food, crafts, traditions, and everyday cultural practices, but much of this knowledge remains difficult for travelers to discover and for local people to monetize directly.
Three problems exist simultaneously:
1. Travelers struggle to discover authentic micro-experiences.
Most tourism discovery is organized around destinations, attractions, and established tours. Travelers who want to learn a local recipe, make a traditional craft, or meet a neighborhood artisan have limited ways to find trustworthy experiences outside the mainstream tourism circuit.
2. Local cultural knowledge is difficult to commercialize independently.
Many artisans, home cooks, craftspeople, and community members possess valuable cultural knowledge but lack simple tools to promote their activities, manage reservations, communicate with international guests, and receive payments.
3. Language and trust create friction.
Travelers may hesitate to visit an unfamiliar local home or workshop, while hosts may feel uncomfortable communicating with foreign visitors. Both sides need clearer information, verification, scheduling, and communication support.

2. The Solution
VieBee connects travelers with verified local hosts through a cultural discovery marketplace built around workshops, stories, people, and places. A traveler can open VieBee, explore a Cultural Map, discover a nearby workshop, learn about the host and cultural story behind it, check available time slots, and RSVP.
For the host, VieBee provides a simple way to:

1. Create a workshop
2. Set availability and capacity
3. Manage RSVPs
4. Present their cultural story
5. Communicate with travelers
6. Receive payments

7. Build trust through reviews and verification

Core features

- **Cultural Map:** A dynamic map showing workshops, artisans, community spaces, food traditions, and cultural activities.

- **Micro-Workshop Marketplace:** Small-scale experiences such as traditional cooking, weaving, pottery, embroidery, bamboo crafting, local food preparation, and other community-led activities.

- **Community Verification:** Host profiles and experiences are reviewed through identity verification, community validation, reviews, and platform moderation.

- **AI Cultural Copilot:** AI-assisted translation and cultural context help travelers and hosts communicate while also explaining relevant cultural practices, etiquette, ingredients, techniques, and stories.

A useful distinction:
LangChain + RAG is the technology behind the Cultural Copilot, not the product itself.

3. Core Value Proposition

Stakeholder	Value
Travelers	Authentic, small-scale cultural experiences that are easier to discover, understand, and book
Local Hosts & Artisans	A low-friction digital tool to earn income from cultural knowledge without needing advanced technical skills
Freelance Guides	A curated cultural map for discovering unique workshops and enriching personalized itineraries
Communities	Economic incentives to maintain traditional skills, food practices, crafts, and stories
Cities / Tourism Ecosystem	Diversification of tourism beyond major attractions and established operators

4. Target Users
VieBee is a two-sided marketplace with supporting ecosystem partners.
Primary demand side:
-> Independent international travelers
Travelers who:

1. Are visiting Vietnam independently or in small groups

2. Prefer authentic/local experiences
3. Are comfortable using mobile apps or online booking
4. Are interested in food, crafts, culture, and everyday life
5. Prefer experiences that are shorter and easier to fit into an itinerary

Primary supply side
-> Local cultural hosts and artisans
Examples:

1. Home cooks
2. Traditional craft makers
3. Tailors
4. Potters
5. Weavers
6. Farmers
7. Family-run cultural spaces
8. Elder artisans
9. People with specialized local knowledge

Secondary segments
-> Domestic experiential travelers

1. Young adults and families looking for meaningful weekend or short-trip cultural activities.
2. Freelance tour guides
3. Guides who can use VieBee's Cultural Map to add local workshops to personalized itineraries.
4. Tourism partners
5. Hotels, hostels, cultural organizations, and destination organizations that can refer travelers to VieBee.

5. Why Now / Market Opportunity
-> Vietnam's tourism market provides a substantial base for an experience marketplace.
-> Vietnam received nearly 21.2 million international visitors in 2025, an increase of 20.4% year over year.
-> In the first eight months of 2026, Vietnam recorded approximately 15.9 million international arrivals, up 14.4% from the same period in 2025.
-> Vietnam also recorded approximately 135.5 million domestic tourist trips in 2025, according to the Vietnam National Authority of Tourism.

This provides VieBee with a large underlying travel audience while allowing the company to begin with a much narrower, more manageable customer segment.
The demand for cultural and community-based tourism is also supported by research in Vietnam. Recent studies identify authenticity, cultural engagement, community interaction, and perceived value as important aspects of community-based tourism experiences.

6. Competitive Landscape

Competitor	Main offering	Strength	Gap VieBee targets
Airbnb Experiences	Local activities and experiences	Large global audience and established booking infrastructure	Broad marketplace; not specifically designed around community heritage preservation and hyper-local cultural mapping
Tubudd	Local buddies and customized local experiences	Strong local-person connection	Focuses primarily on personal local guides rather than structured, skill-based cultural workshops
Meetup	Local groups and events	Large community/event network	General-purpose events rather than tourism-focused cultural experiences
Luma	Event creation and registration	Simple event management and RSVP tools	General-purpose event platform rather than a Vietnam cultural marketplace
VieBee	***Cultural workshops + Cultural Map + AI cultural support***	***Specialized community heritage model***	***Designed specifically around local cultural hosts and living heritage***

Details:
Airbnb currently lists cooking, cultural tours, food tours, tastings and numerous hands-on

workshops in Vietnam, showing that the category already has consumer demand. Airbnb also states that it typically charges 20% of the experience price as a host service fee, which gives VieBee a potential positioning around a simpler, community-friendly economic model, although the exact VieBee take rate should be validated.
Tubudd explicitly positions its service around local buddies who accompany travelers and customize local itineraries.
Meetup and Luma are general event/community platforms rather than platforms specifically designed for Vietnamese cultural heritage experiences.

7. VieBee's Competitive Differentiation
Three pillars to support:
01 - Living Heritage Marketplace
Not simply "things to do," but experiences connected to people, skills, traditions, stories and places.

02 - Cultural Map
Instead of browsing only by activity category, travelers discover culture geographically:
"What can I experience around me?"

03 - AI Cultural Copilot
AI reduces communication friction by providing:
Translation → Context → Etiquette → Workshop information
The AI should be grounded in verified VieBee knowledge and host-provided information rather than presenting itself as an unrestricted cultural authority.

8. Scalability & Growth Potential
The strongest scalability argument is not "AI makes everything cheap."
Instead:
VieBee is digitally scalable because the marketplace does not need to own physical tourism infrastructure. Hosts provide the experiences while VieBee provides discovery, trust, booking, communication and digital coordination.

The expansion model can be:
Pilot neighborhood → City → Cultural destinations → Vietnam → Southeast Asia

For example:
Phase 1: Ho Chi Minh City
Phase 2: Hoi An + Hue + Hanoi
Phase 3: Other cultural and craft destinations across Vietnam
Phase 4: Selected Southeast Asian markets with similar community-tourism characteristics
This is also consistent with the diversity of tourism products already being developed in Vietnam around heritage, cultural, community and sustainable tourism.

9. Social & Cultural Impact
VieBee should explicitly position impact as part of the business model rather than as a separate charity component.
1. Economic impact
More tourism spending can reach individual hosts and small community businesses directly.
2. Cultural impact

Traditional food, crafts, techniques and stories become economically valuable and therefore more sustainable.

3. Social impact

Local residents become active participants in tourism rather than only consumers of tourism's economic effects.

4. Tourism impact

Visitors are encouraged to explore beyond major attractions and interact with communities in smaller groups.

10. Revenue Model (Proposed)

Primary revenue:

-> Transaction commission: VieBee takes a small percentage from each successfully booked experience.

For example:

Target platform take rate: 10-15%

This should be presented as a proposed model to validate, not a finalized number.

Future revenue:

Potential future streams include:

1. Premium promotion for hosts
2. B2B partnerships with hotels/hostels
3. Tools for professional guides
4. Destination/cultural organization partnerships
5. Curated thematic collections or city passes

11. MVP

Traveler side

- Account / lightweight onboarding
- Cultural Map
- Browse workshops
- Workshop detail, Date/time availability
- Host profile
- RSVP/booking
- Reviews

Host side

- Host registration
- Create workshop
- Set capacity
- Set schedule
- Manage RSVPs
- View reviews

AI

- Traveler ↔ host translation
- Workshop Q&A
- Basic cultural explanation
- AI answers grounded in verified workshop information

Admin

- Host verification
- Workshop moderation
- User management
- Reports / reviews

VieBee - Khắc họa di sản, Nâng tầm cộng đồng

Tên tiếng Anh: VieBee - Mapping Living Heritage, Empowering Communities

1. Giới thiệu dự án

VieBee là nền tảng du lịch trải nghiệm kết nối trực tiếp du khách quốc tế với người dân địa phương, nghệ nhân và những người nắm giữ tri thức văn hóa truyền thống. Thông qua bản đồ văn hóa số và công nghệ dịch thuật AI theo thời gian thực, VieBee giúp du khách dễ dàng khám phá các hoạt động văn hóa bản địa, đồng thời tạo cơ hội để cộng đồng địa phương quảng bá giá trị văn hóa và gia tăng thu nhập.

Thông điệp: Khám phá Việt Nam vượt ra ngoài những trang cẩm nang du lịch, qua chính những con người đang sống và gìn giữ văn hóa nơi đây.

2. Vấn đề đặt ra

Việt Nam sở hữu nền văn hóa phong phú về ẩm thực, làng nghề, thủ công mỹ nghệ và phong tục truyền thống. Tuy nhiên, việc kết nối những giá trị này với du khách vẫn còn nhiều hạn chế:

- **Khó tìm kiếm trải nghiệm bản địa:** Du khách thường tiếp cận các địa điểm nổi tiếng và tour phổ biến, trong khi những hoạt động quy mô nhỏ như nấu ăn tại nhà, làm đồ thủ công hay giao lưu với nghệ nhân chưa được quảng bá rộng rãi.

- **Hạn chế trong khai thác giá trị văn hóa:** Nhiều người dân có kỹ năng và kiến thức văn hóa quý giá nhưng thiếu công cụ để quảng bá, quản lý đặt chỗ và tạo thu nhập từ hoạt động của mình.

- **Rào cản ngôn ngữ và niềm tin:** Khó khăn trong giao tiếp, xác minh thông tin và bảo đảm độ tin cậy khiến cả du khách lẫn người tổ chức còn e ngại khi tham gia trải nghiệm.

3. Giải pháp của VieBee

VieBee xây dựng một nền tảng khám phá và đặt chỗ trải nghiệm văn hóa, nơi du khách có thể tìm kiếm hoạt động trên bản đồ, tìm hiểu câu chuyện của người tổ chức, xem lịch trống và đăng ký tham gia.

Đối với người dân địa phương, nền tảng hỗ trợ tạo hoạt động trải nghiệm, quản lý lịch trình và số lượng khách, tiếp nhận đăng ký, giới thiệu câu chuyện văn hóa, giao tiếp với du khách và nhận thanh toán.

Các tính năng chính

- **Bản đồ văn hóa (Cultural Map):** Hiển thị các xưởng thủ công, nghệ nhân, không gian cộng đồng, đặc sản và hoạt động văn hóa theo vị trí địa lý.

- **Chợ trải nghiệm văn hóa (Micro-Workshop Marketplace):** Kết nối du khách với các hoạt động như nấu món truyền thống, làm gốm, dệt vải, thêu, đan tre và chế biến món ăn địa phương.

- **Xác minh cộng đồng:** Xây dựng niềm tin thông qua xác minh danh tính, đánh giá, xác nhận từ cộng đồng và kiểm duyệt nội dung.

- **Trợ lý văn hóa AI (AI Cultural Copilot):** Hỗ trợ dịch thuật, giải thích bối cảnh văn hóa, phong tục, phép lịch sự và thông tin liên quan đến từng hoạt động dựa trên dữ liệu đã được kiểm chứng.

4. Giá trị mang lại

- **Du khách:** Dễ dàng tìm kiếm và tham gia các trải nghiệm văn hóa chân thực, gần gũi với đời sống địa phương.
- **Người dân và nghệ nhân:** Có thêm cơ hội quảng bá kỹ năng, chia sẻ tri thức và tạo thu nhập mà không cần nhiều kiến thức công nghệ.
- **Hướng dẫn viên tự do:** Khám phá các trải nghiệm độc đáo để xây dựng lịch trình cá nhân hóa.
- **Cộng đồng địa phương:** Tạo động lực duy trì nghề truyền thống, ẩm thực, kỹ thuật thủ công và các câu chuyện văn hóa.
- **Hệ sinh thái du lịch:** Đa dạng hóa sản phẩm du lịch, giảm sự phụ thuộc vào các điểm tham quan và tour phổ biến.

5. Đối tượng khách hàng

Nhóm chính:

- Du khách quốc tế đi tự túc hoặc theo nhóm nhỏ, quan tâm đến văn hóa, ẩm thực, thủ công và đời sống địa phương.
- Người dân địa phương, nghệ nhân, đầu bếp gia đình, thợ thủ công, nông dân và những người có kiến thức văn hóa đặc thù.

Nhóm mở rộng:

- Du khách nội địa tìm kiếm hoạt động văn hóa vào cuối tuần hoặc trong các chuyến đi ngắn.
- Hướng dẫn viên tự do muốn bổ sung trải nghiệm bản địa vào lịch trình.
- Khách sạn, homestay, tổ chức văn hóa và đơn vị xúc tiến du lịch có nhu cầu giới thiệu trải nghiệm cho du khách.

6. Cơ hội thị trường

Việt Nam có tiềm năng phát triển nền tảng du lịch trải nghiệm nhờ lượng khách du lịch quốc tế và nội địa lớn, cùng sự đa dạng về di sản, nghề thủ công và văn hóa cộng đồng.

VieBee tập trung vào một phân khúc cụ thể: những du khách muốn khám phá văn hóa địa phương thông qua các hoạt động quy mô nhỏ, có tính tương tác cao. Cách tiếp cận này giúp dự án bắt đầu với phạm vi phù hợp, kiểm chứng nhu cầu thị trường trước khi mở rộng.

7. Đối thủ cạnh tranh và lợi thế khác biệt

Một số nền tảng có liên quan gồm Airbnb Experiences, Tubudd, Meetup và Luma. Các nền tảng này cung cấp hoạt động trải nghiệm, kết nối người địa phương hoặc hỗ trợ tổ chức sự kiện.

VieBee tạo sự khác biệt thông qua ba yếu tố:

1. **Nền tảng trải nghiệm di sản sống:** Tập trung vào con người, kỹ năng, nghề truyền thống, câu chuyện và giá trị văn hóa thay vì chỉ giới thiệu địa điểm vui chơi.

2. **Bản đồ văn hóa:** Giúp du khách khám phá trải nghiệm theo vị trí địa lý, từ đó tìm thấy những hoạt động thú vị ngay gần mình.

3. **Trợ lý văn hóa AI:** Hỗ trợ dịch thuật và cung cấp thông tin văn hóa phù hợp, giúp hai bên giao tiếp thuận tiện hơn.

Công nghệ AI đóng vai trò hỗ trợ trải nghiệm; nội dung văn hóa cần dựa trên thông tin từ người tổ chức và nguồn đã được xác minh.

8. Khả năng mở rộng

VieBee có khả năng mở rộng nhờ mô hình nền tảng số, không cần trực tiếp sở hữu cơ sở vật chất để tổ chức các hoạt động. Người dân cung cấp trải nghiệm, còn VieBee hỗ trợ khám phá, kết nối, đặt chỗ và giao tiếp.

Lộ trình phát triển dự kiến:

- **Giai đoạn 1:** Thử nghiệm tại TP. Hồ Chí Minh.

- **Giai đoạn 2:** Mở rộng đến Hội An, Huế và Hà Nội.

- **Giai đoạn 3:** Phát triển tại các địa phương có thế mạnh về di sản và làng nghề.

- **Giai đoạn 4:** Xem xét mở rộng sang các thị trường Đông Nam Á có đặc điểm du lịch cộng đồng tương đồng.

9. Tác động xã hội và văn hóa

VieBee hướng đến việc kết hợp giá trị kinh doanh với lợi ích cộng đồng:

- **Kinh tế:** Tạo thêm nguồn thu trực tiếp cho người dân và các cơ sở kinh doanh nhỏ.

- **Văn hóa:** Khuyến khích bảo tồn nghề truyền thống, ẩm thực, kỹ thuật thủ công và tri thức bản địa.

- **Xã hội:** Tăng vai trò chủ động của người dân trong hoạt động du lịch.

- **Du lịch:** Khuyến khích du khách khám phá các khu vực ngoài điểm đến phổ biến và tham gia hoạt động theo nhóm nhỏ.

10. Mô hình doanh thu

Nguồn thu chính: Thu phí hoa hồng trên mỗi giao dịch đặt trải nghiệm thành công.

Dự kiến mức phí nền tảng từ **10–15%** giá trị giao dịch. Đây là mức đề xuất ban đầu cần được kiểm chứng thông qua thử nghiệm thị trường và phản hồi của người tổ chức.

Nguồn thu tiềm năng trong tương lai:

- Dịch vụ quảng bá nâng cao cho người tổ chức.
- Hợp tác với khách sạn, homestay và doanh nghiệp du lịch.
- Công cụ hỗ trợ hướng dẫn viên chuyên nghiệp.
- Hợp tác với tổ chức văn hóa và đơn vị phát triển điểm đến.
- Bộ sưu tập trải nghiệm theo chủ đề hoặc vé trải nghiệm theo thành phố.

11. Phiên bản sản phẩm tối thiểu (MVP)

Phiên bản đầu tiên tập trung vào các chức năng thiết yếu để kiểm chứng nhu cầu và tính khả thi.

Dành cho du khách:

- Đăng ký và đăng nhập tài khoản.
- Khám phá bản đồ văn hóa và danh sách trải nghiệm.
- Xem chi tiết hoạt động, hồ sơ người tổ chức và lịch khả dụng.
- Đặt chỗ và đánh giá trải nghiệm.

Dành cho người tổ chức:

- Đăng ký hồ sơ.
- Tạo hoạt động và giới thiệu câu chuyện văn hóa.
- Thiết lập lịch trình, sức chứa và quản lý đăng ký.
- Theo dõi đánh giá từ du khách.

Tính năng AI:

- Dịch thuật giữa du khách và người tổ chức.
- Trả lời câu hỏi về hoạt động trải nghiệm.
- Giải thích thông tin văn hóa cơ bản dựa trên dữ liệu đã xác minh.

Quản trị hệ thống:

- Xác minh người tổ chức.
- Kiểm duyệt hoạt động.
- Quản lý người dùng, đánh giá và báo cáo.

Kết luận

VieBee hướng đến việc kết nối du lịch với bảo tồn di sản văn hóa thông qua một nền tảng số dễ tiếp cận. Bằng cách kết hợp bản đồ văn hóa, trải nghiệm do cộng đồng tổ chức và công nghệ AI hỗ trợ giao tiếp, dự án tạo cơ hội để du khách khám phá Việt Nam chân thực hơn, đồng thời giúp người dân địa phương phát huy giá trị văn hóa và phát triển sinh kế bền vững.

Workshop 1 notes
How to let people use your product?
"Nobody is gonna try your product unless there's someone already tried it"
Approach someone that accept the risk of using your product -> Find initial customer
Every brand has their own uniqueness -> We should find our own uniqueness too, and the question is how can we compete?

Framework: OKRs (Objectives and Key Results)
What will our app look like
The deadline for the first milestone is next 2 weeks.

Questions
How can we know the objective is achievable? What is an achievable goal?
We should define our Target audience (which we already had) BUT we should let many types of users try, not just only Target audience.

1. Our objective should be clear, it should go along with key results
   Example: ***100 users (Key results)*** in ***3 months => Objective***

2. There will be many layers of **objectives**,
   Example: 100 users in 3 months => then what next? => The bigger objective is to find first customers for the project

1. Lag Measures
Metrics that cannot be directly influenced are referred to as lag measures

2. Lead Measures
Metrics that can be directly influenced and whose progress can be measured immediately or only after a short delay.

Workshop requirements:
Define our OKRs for the entire competitions

Our objectives:
-> What do I want to achieve?
-> How do I know that I have reached my goals?
-> Qualitative, simple
-> Quantitative, Measurable, 1-5 key results per objective
Example: To raise the number of uni students going to bed before 10 p.m

Key results:

Nội dung chi tiết
a. Vòng loại 1 (05/10/2026 – 15/11/2026):

- Các đội thi xây dựng ý tưởng, kế hoạch của dự án.
- Khoa CNTT cử giảng viên phụ trách cùng người hướng dẫn từ phía doanh nghiệp (nếu có) hỗ trợ trực tuyến thường xuyên cho đội thi qua các kênh hỗ trợ.
- Đội thi nộp lại 01 bản thuyết minh dự án dưới dạng file mềm, video thuyết minh dự án tối đa 03 phút và các tài nguyên khác để minh họa dự án.
- BTC tiến hành chấm điểm bài dự thi và công bố tối đa 16 đội xuất sắc nhất bước tiếp vào Vòng loại 2.

b. Vòng loại 2 (23/11/2026 – 10/01/2027):

- Các đội thi tiến hành hiện thực hóa ý tưởng đã trình bày ở Vòng loại 1 thông qua việc xây dựng PoC/Prototype/MVP cho sản phẩm.
- Khoa CNTT và người hướng dẫn doanh nghiệp tiếp tục đồng hành, cố vấn kỹ thuật và phát triển sản phẩm cho các đội thi.
- Đội thi nộp lại toàn bộ các sản phẩm ở Vòng loại 1 kèm sản phẩm hiện thực (PoC/Prototype/MVP) và 01 video pitching giới thiệu sản phẩm có thời lượng tối đa 05 phút.
- BTC chấm bài dựa trên bài dự thi và công bố 06 đội xuất sắc nhất tiến vào Vòng Chung kết.

c. Vòng Chung kết (18/01/2027 – 21/02/2027):

- Các đội thi tiếp tục hoàn thiện sản phẩm của mình với sự hỗ trợ từ người hướng dẫn doanh nghiệp và phải báo cáo tiến độ sản phẩm liên tục cho BTC.

- Khoa CNTT cử giảng viên phụ trách cùng các người hướng dẫn khởi nghiệp từ phía doanh nghiệp hỗ trợ trực tuyến thường xuyên cho đội thi qua các kênh hỗ trợ.

- BTC tổ chức Triển lãm sản phẩm theo hình thức trực tiếp, đồng thời tổ chức bình chọn sản phẩm theo hình thức Online; trong đó, điểm bình chọn được tính 30% vào điểm tổng kết của đội thi trong Vòng Chung kết, và 01 đội có bình chọn cao nhất (không thuộc 06 đội vào Vòng Chung kết) sẽ được trao giải Đội thi được yêu thích nhất.

- Seminar kiến thức xây dựng hồ sơ khởi nghiệp: 01 buổi – Giảng viên bộ môn Kỹ năng của Trường.

- Seminar kiến thức Agentic AI: 01 buổi – Giảng viên Khoa CNTT.

- Ngoài ý tưởng và kế hoạch, sản phẩm của Vòng Chung kết yêu cầu phải có nguyên mẫu (prototype) của sản phẩm.

- Các đội thi tham gia Buổi thuyết trình Vòng chung kết (pitching day) để trực tiếp trình bày sản phẩm của đội trước Ban giám khảo Vòng Chung kết, tổ chức trực tiếp tại Trường vào ngày 27/02/2027.

- BTC tiến hành chấm điểm và công bố kết quả, trao giải cho các đội thi tại buổi thuyết trình trực tiếp của Vòng chung kết.

Detailed Content
a. Qualifying Round 1 (10/05/2026 – 11/15/2026):

- Participating teams develop project ideas and plans.

- The Faculty of IT assigns instructors and corporate mentors (if any) to provide regular online support for teams through support channels.

- Teams submit 01 soft copy of the project proposal, a project presentation video of up to 3 minutes, and other illustrative resources.

- The Organizing Committee evaluates the submissions and announces up to 16 outstanding teams advancing to Qualifying Round 2.

b. Qualifying Round 2 (11/23/2026 – 01/10/2027):

- Teams realize the ideas presented in Qualifying Round 1 by building PoC/Prototype/MVP for their products.

- The Faculty of IT and corporate mentors continue to accompany, advise on technical aspects, and help teams develop their products.

- Teams resubmit all materials from Qualifying Round 1 along with the actual product (PoC/Prototype/MVP) and 01 pitching video of up to 5 minutes.

- The Organizing Committee evaluates submissions and announces the top 06 teams advancing to the Final Round.

c. Final Round (01/18/2027 – 02/21/2027):

- Teams continue refining their products with guidance from corporate mentors and must continuously report product progress to the Organizing Committee.

- The Faculty of IT assigns instructors and corporate startup mentors to provide regular online support for teams through support channels.

- The Organizing Committee conducts an in-person product exhibition alongside online voting; voting points account for 30% of the team's total Final Round score, and the 01 team with the highest votes (outside the top 06 finalists) will receive the Most Popular Team award.

- Startup portfolio building seminar: 01 session – Lecturer from the University's Skills Department.

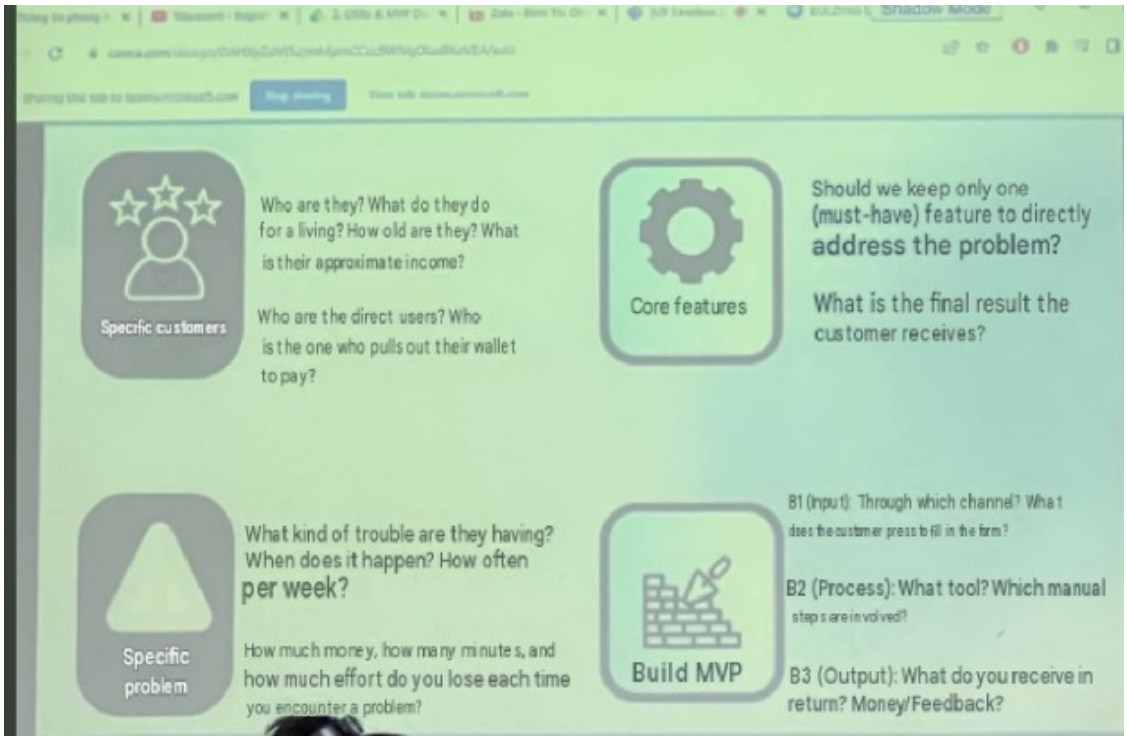

- Agentic AI knowledge seminar: 01 session – Lecturer from the Faculty of IT.

- In addition to the idea and plan, Final Round products are required to have a prototype.

- Teams participate in the Final Presentation Day (pitching day) to directly present their products to the Judges, held in person at the University on February 27, 2027.

- The Organizing Committee evaluates and announces the results, presenting awards to teams at the live pitching session of the Final Round.

Workshop 2:
Prototype and MVP Development
- Integrate hypothesis testing (planning, data collection) in Prototype and MVP development
- Quick Prototype and MVP development tools
- Development the set of Objectives and Key Results for their own projects
Content for reference: ***https://canva.link/o6do24r75bgf969***

Chou & Htet

1. **Specific customer**

- Who are they ?

1) International Tourists. We focus on English Speaking tourists first because English is a common language that all tourists will use to communicate.

2) Local people who want to make some money by sharing their cultural knowledge and experience to tourists but have language barriers, RSVP problems, etc.

- What do they do ?

1) They can be Freelancers, young enthusiasts, or middle aged people.

   (eg. a bun bo shop owner who wanted to be a tour guide before, knows how to make traditional Vietnamese foods such as bun bo, and want to invite foreigners to her shop one day make a cooking workshop, shopping and etc)

- How much salary do they have?

1) For salary, there are few information about this, but the average spending of travelers in Vietnam is around $1-2k, quite cheap for their budget

- Who is the direct user ?

1) Tourists (both International and Locals who like to explore)

2) Hosts (local people)

- Who is the one willing to pay for the product ?

1) Mostly international travelers who want authentic local life experience, because in Vietnamese market, it is cheap compare to their hometown

Long & Kaka

2. **Core feature of the product**

- Keep only one must-have feature to directly solve?

- The final result that customers have ?

Tuna

3. **Specific Problem that customer have**

- What problem do they encounter ?

1) International tourists: Want to experience authentic local culture, but:

- Information scattered on Google, TikTok/Instagram, blogs and Airbnb.
  - Not sure if they can communicate with the host (language barrier).
  - *For short trips (3-7 days), there is no need to plan carefully. (can be removed)*

2) Local Hosts

- Have cultural skills, experiences but there are no particular channel to reach international guests

- Limited foreign-language ability, so they hesitate to communicate with and accept guests.

- Lack tools to manage schedules, take bookings and receive payments.

- Airbnb Experiences has high fees and a high barrier to entry.

- How frequently do they have that problem (time/week) ? -> Câu này m nhớ note là du khách thì sẽ gặp khi đi du lịch thui

1) Travelers do not face this problem weekly but per trip:

- 1 time per trip during the planning stage (before departure).
- 3-5 times per trip when searching for activities on the ground (e.g., choosing something for the next day each evening)

2) Local Hosts: This problem occurs daily/weekly, since it is a continuous operational barrier:

- Each inquiry from a foreign guest (messages, availability questions) may be missed or answered slowly. We need to measure inquiries per week.
- When they encounter the problem, how many lost that they have (how much money, how much time, how much effort) ?

1) Travelers:

- Time: ~2-4 hours of searching, comparing and verifying for each experience finally chosen
- Money: Picking an "industrial tour" or an experience that does not match its description loses ₫100K-₫600K per time
- Opportunity: Skipping local experiences entirely out of fear of risk, or because none could be found
- Effort: Comparing multiple platforms, translating manually, checking maps

2) Local hosts:

- Revenue: e.g., 3 guests/week × ₫450K ≈ ₫1.35 million/week
- Time: Messaging, manual translation, scheduling: a few hours per week
- Effort: Using Google Translate, asking children to translate, building their own promotion pages
- Costs: High platform commission (Airbnb), or tour operators keeping most of the revenue

4. Build MVP

- 3 step:

- B1 (Input): Through what channel ? What will they input/press ?

-> Interact via our Platform - VieBee, in which there are 2 interfaces:

1. For Travelers, they can type in what they want to experiences, searching via Map

2. For Hosts, they can follow the guidance to create an Event, Workshops, etc

- B2 (Process): Use what tools ? What steps do they need to do by hand

1. Typing by hand

- B3 (Output): What do they have from that ? How to Receive Money/Feedback ?

Read VieBee tracking doc. Workshop 2 section = empty template. Filled below, using Milestone 1-5 data. Numbers marked **(assume)** = not verified. Validate in interviews.

1. Specific customer

Beachhead: independent foreign traveler, HCMC District 1/3. Supply side (host) = second customer. Solve traveler first, host rides along.

Question	Answer
Who	Maya-type persona: 28, female, Melbourne, solo or small group, 7-10 day Vietnam trip
What do	Digital marketing / tech worker. Books online, uses phone for everything
Salary	Middle to upper-middle income. About AUD 80-100k/year **(assume)**. Verify in survey
Direct user	Traveler (books, chats with host) + host (teaches). Host use via simple chat, not app
Who pays	Traveler. About VND 450K per workshop. VieBee keeps 12%, host gets 88%

2. Core feature

One must-have: book hosted workshop + AI two-way translation chat with host. (Real-time translation feature).

- **Cut from MVP:** GIS map, escrow, admin panel, reviews system. Replace with manual.

- **Why this one:** If the AI fails, the product fails and leads to degraded customer experience .

- **Final result:**

- ***For the Customer:*** finish a 90-min hands-on workshop (e.g. cook *chè*) with a local host. Understand the host with no interpreter needed.

- ***For the Host:*** The local host can complete the workshop, gets paid by the

3. Specific problem

Question	Answer
Problem	Cannot find trusted local workshop outside tourist traps. Cannot talk to non-English host. Fear unknown home
Frequency	Per trip: 2-3 search/booking attempts per week of trip **(assume)**. Not weekly habit, trip-based
Time lost	2-3 hours searching per trip **(assume)**
Money lost	Overpay on commercial tour, or pay ~20% Airbnb fee built into price
Effort lost	Messages fail, confusion on address and time, many tabs. Often give up, book generic bus tour

Host side: no English, no digital skill, Airbnb fee ~20%. Many never list at all.

Test these numbers in 20 interviews (Hypothesis 1). Ask: “Last trip, how long you search? What you booked? What you give up?”

4. Build MVP (concierge style)

Step	Detail
B1 Input	Channel: 1-page landing site + QR stand in 10 hostels/hotels + WhatsApp/Zalo. Traveler press “Book workshop”. Fill: name, contact, date, guests count. Press “Chat with host”
B2 Process	Tools: Carrd/Framer or small Next.js page, Google Sheets/Airtable for bookings, WhatsApp/Telegram bot with LangChain RAG (host-verified knowledge: ingredients, etiquette, steps). **By hand:** verify host, confirm slot, send payment link (Stripe/PayPal/VietQR), remind host. Check bot answers before scale

Step	Detail
B3 Output	Traveler get confirm message, address pin, workshop session. Money: payment link in, VieBee send host 88% by bank transfer after workshop. Feedback: QR rating form (1-5 + NPS + “understood host?”) right after workshop

Hypothesis testing plan

Hypothesis	Plan	Data collect	Pass
H1 Problem: communication + discovery top barriers	Survey + 20 interviews, D1/D3	Friction score 1-5, interview notes	≥65% rate 4-5
H2 Solution: AI translation works	Live test: 5 travelers + 2 artisans, WhatsApp RAG bot	Bot logs, human-intervention count, rating	≥80% no human help, ≥4.2/5
H3 Price: 400-500K VND, host accept 12%	Landing page fake booking at 450K + 15 host interviews	Checkout clicks, host yes/no	≥7% checkout intent, 12/15 hosts accept
H4 GTM: hostel QR stands	10 partners, UTM QR, 21 days	Scans, bookings per partner	≥150 scans, ≥8 bookings

Rule: write pass/fail number BEFORE test. Log in one Google Sheet. Review each bi-weekly.

Quick prototype tools

- **UI:** Figma (clickable), Canva for pitch visuals
- **Landing/fake door:** Carrd, Framer, Google Forms
- **Backend fast:** Airtable/Sheets + Make/Zapier, or SQLite + small FastAPI
- **AI bot:** LangChain + RAG over host knowledge doc, run on WhatsApp/Telegram
- **Map (later):** Leaflet + OpenStreetMap
- **Analytics:** UTM + QR code, Google Analytics, Hotjar

OKRs (Round 2: 23 Nov 2026 - 10 Jan 2027)

O1: Prove traveler wants to book community workshops

- KR1: 20 traveler interviews done, ≥65% rate barriers 4-5

- KR2: ≥7% checkout intent on landing page
- KR3: ≥150 QR scans, ≥8 bookings in 21 days (lag)

O2: Prove host can join with zero tech skill

- KR1: 15 hosts interviewed, 12 accept 12% take rate
- KR2: 5 hosts listed workshop with minimal help
- KR3: Host onboarding under 15 min (lead)

O3: Prove AI translation replace interpreter

- KR1: 7 live sessions (5 travelers, 2 artisans)
- KR2: ≥80% chat turns without human help
- KR3: Satisfaction ≥4.2/5

Lead vs lag: lead = interviews done, hosts onboarded, stands placed. Lag = bookings, revenue, rating.

Gaps to fix first

- Salary, frequency, loss numbers all assumption. Interviews fill them.
- Doc has no host-side must-have list. Pick: “create workshop in 3 taps via chat”.
- Need mentor decision on host QC (doc note: “we need to discuss with the mentor”).

Want me to put this in a Google Doc or slides?

VieBee - Workshop 2: Prototype & MVP Plan

Prototype and MVP Development. Hypothesis testing, quick tools, OKRs. Numbers marked **(assume)** = not verified. Validate in interviews.

1. Specific customer

Beachhead: independent foreign traveler, HCMC District 1/3. Supply side (host) = second customer. Solve traveler first, host rides along.

Question	Answer
Who	Maya-type persona: 28, female, Melbourne, solo or small group, 7-10 day Vietnam trip
What do	Digital marketing / tech worker. Books

Question	Answer
	online, uses phone for everything
Salary	Middle to upper-middle income. About AUD 80-100k/year **(assume)**. Verify in survey
Direct user	Traveler (books, chats with host) + host (teaches). Host use via simple chat, not app
Who pays	Traveler. About VND 450K per workshop. VieBee keeps 12%, host gets 88%

2. Core feature

The one must-have feature is the AI Cultural Copilot: two-way traveler-host translation, grounded in host-verified workshop information (LangChain + RAG), delivered inside the workshop booking chat.

Everything else in the MVP scope (map, listing tool, verification, payouts) is handled by hand or by simple tools until this one feature is proven.

Why this feature, based on the tracking doc

Evidence in the tracking doc	What it says	Why it points to the Copilot
Milestone 3, root cause	Hosts lack foreign language and digital skills; existing platforms demand both	Language is the first barrier on both sides of the marketplace
Milestone 4, Hypothesis 2	A 90-minute workshop with 4.2/5 satisfaction and 80% of interactions without a human, no bilingual guide	The team already defined the test for this feature
Milestone 4, Insight 1	Hosts need fact-checked translations of ingredients, equipment, safety and etiquette, not an open chatbot	Defines the feature as grounded RAG, not a general bot
Milestone 5, Fit Analysis	Travelers and hosts both need real-time communication without a paid interpreter	One feature serves demand and supply together
Competitors (Airbnb, Tubudd, Luma, Meetup)	None offers AI translation for community hosts	This is the clearest differentiator in the USP
Milestone 1, assumptions table	“AI translation reduces communication friction” is a core feature hypothesis	Riskiest assumption: if it fails, the marketplace has no product

What the feature does in the MVP

The Copilot follows the proposal's four-step chain, **Translation → Context → Etiquette → Workshop information**, and answers only from verified data.

Step	What the Copilot does in the MVP	Proposal problem it removes
Translation	Two-way text chat, traveler English ↔ host Vietnamese, before and during the workshop	Language friction: hosts feel uncomfortable communicating with foreign visitors
Context	Short explanation of an ingredient, technique or story, taken from the host's knowledge sheet	Travelers cannot understand the cultural story behind the craft
Etiquette	Customs and house rules for entering a local home	Travelers hesitate to visit an unfamiliar home; hosts fear disrespect
Workshop information	Time, address, what to bring, steps and safety, from the verified workshop sheet	Hosts lack simple tools to communicate scheduling and details with international guests

Grounding rule from the proposal: the AI is grounded in verified VieBee knowledge and host-provided information, and never presents itself as an unrestricted cultural authority. If the sheet has no answer, the bot says so and flags a human.

Host input: one knowledge sheet per workshop covering steps, ingredients, equipment, safety tips, etiquette and the story behind the craft. This is the only data the host has to provide for the AI side. The proposal also notes that LangChain + RAG is the technology behind the Copilot, not the product itself.

How other features are treated in the MVP

Feature in the tracking doc MVP scope	Treatment for this MVP
Dynamic GIS Cultural Map	Not built. A shared link with the workshop address pin replaces it
Workshop listing and RSVP	Google Sheet or form, filled by the team with the host
Community verification and QC	Done by hand: team visits the host, checks ID and the space (mentor decision still open)
Automated escrow payouts	Payment link in, manual bank transfer to the host (88% after a 12% take rate)
Reviews	Rating form sent after the workshop

Why the other proposal pillars are not the must-have

Pillar in the proposal	Why it waits
Cultural Map	Solves discovery, but a handful of pilot hosts can be shown as a shared list or link. The map needs host density first
Micro-Workshop Marketplace (listing, RSVP, payments)	Mostly booking logistics. A form, a sheet and a payment link cover it
Community Verification	Essential for trust, but at pilot scale the team verifies hosts by hand
AI Cultural Copilot	Cannot be faked by hand once sessions multiply, and it is the riskiest assumption in the proposal

Trade-off: the Copilot directly solves the proposal's third problem (language and trust friction). It does not solve discovery. In the pilot, discovery is covered manually through the hostel and hotel QR stands tested in Hypothesis 4.

The final result the customer has

The traveler finishes a 90-minute hands-on workshop (for example cooking traditional che) at a local host's home, understands the host's instructions and stories without an interpreter, and pays VND 450K.

The host runs the session in Vietnamese with confidence and receives the payout directly.

End-to-end journey with the one feature

This follows the proposal's flow (discover, learn about the host, check slots, RSVP), with manual steps marked.

1. The traveler opens the VieBee link or hostel QR code and picks a workshop from a team-curated list (manual replacement for the Cultural Map).

2. The traveler asks questions in English. The host answers in Vietnamese. The Copilot translates both ways and answers from the verified sheet.

3. The traveler picks a slot and pays by link. The team confirms the slot with the host by hand.

4. At the workshop, the host teaches in Vietnamese. The traveler uses the chat for questions on ingredients, steps and etiquette.

5. The traveler submits a rating. The host receives the payout by bank transfer.

Result to check	Target	Source in the tracking doc
Chat turns completed without human help	80% or more	Hypothesis 2

Result to check	Target	Source in the tracking doc
Communication satisfaction	4.2/5 or more	Hypothesis 2
Live sessions run	5 travelers and 2 non-English-speaking artisans	Hypothesis 2
Bilingual guide needed on site	None	Hypothesis 2

Risks and one open decision

- Hosts may not use a chat tool comfortably. Milestone 4, Insight 2 says to copy familiar patterns such as Zalo and voice-to-text.
- Translation errors on safety or etiquette could hurt trust. Grounding in the host-verified sheet is the control.
- Decision for the team: this section picks the Copilot as the single must-have. The alternative from the tracking doc is the lightweight RSVP and listing tool, which tests the supply-side hypothesis instead. Confirm the choice before the next bi-weekly update.

3. Specific problem

Question	Answer
Problem	Cannot find trusted local workshop outside tourist traps. Cannot talk to non-English host. Fear unknown home
Frequency	Per trip: 2-3 search/booking attempts per week of trip **(assume)**. Trip-based, not weekly habit
Time lost	2-3 hours searching per trip **(assume)**
Money lost	Overpay on commercial tour, or pay ~20% Airbnb fee built into price
Effort lost	Messages fail, confusion on address and time, many tabs. Often give up, book generic bus tour

Host side: no English, no digital skill, Airbnb fee ~20%. Many never list at all.

Test numbers in 20 interviews (Hypothesis 1). Ask: “Last trip, how long you search? What you booked? What you give up?”

4. Build MVP (concierge style)

Step	Detail
B1 Input	Channel: 1-page landing site + QR stand in 10 hostels/hotels + WhatsApp/Zalo. Traveler press “Book workshop”. Fill: name, contact,

Step	Detail
	date, guests count. Press “Chat with host”
B2 Process	Tools: Carrd/Framer or small Next.js page, Google Sheets/Airtable for bookings, WhatsApp/Telegram bot with LangChain RAG (host-verified knowledge: ingredients, etiquette, steps). **By hand:** verify host, confirm slot, send payment link (Stripe/PayPal/VietQR), remind host. Check bot answers before scale
B3 Output	Traveler get confirm message, address pin, workshop session. Money: payment link in, VieBee send host 88% by bank transfer after workshop. Feedback: QR rating form (1-5 + NPS + “understood host?”) right after workshop

5. Hypothesis testing plan

Hypothesis	Plan	Data collect	Pass
H1 Problem: communication + discovery top barriers	Survey + 20 interviews, D1/D3	Friction score 1-5, interview notes	≥65% rate 4-5

Due: Sunday, 25 October 2026, 23:59
Your updates should include:
- Progress on defining the overall roadmap and OKRs.
- Finalized Roadmap and OKRs (objectives and measurable results).
- Progress on MVP Development Planning, including:

1. Scope of the MVP.
2. Key features to be developed and the related hypotheses.
3. Technology stack to be used.
4. Development timeline.
5. Resources needed (manpower and supporting resources).

Based on the provided project documents, here is the comprehensive breakdown of the **VieBee** project MVP, roadmap progress, OKRs, and development planning details.

Overview of the MVP

VieBee is a peer-to-peer experiential travel marketplace that connects independent international travelers directly with grassroots local hosts (artisans, home cooks, and

craftspeople). It aims to eliminate discovery and language barriers using a **GIS-based Cultural Map** and a **real-time AI Cultural Copilot**.

1. Progress on Defining Roadmap & OKRs

The team has established a structured framework utilizing **Objectives and Key Results (OKRs)**, incorporating both *lag measures* (outcomes like booking volume) and *lead measures* (actionable metrics like host onboarding and user testing conversion rates).

The overarching goal aligns with transitioning from idea validation to a functional MVP during the incubation phases, targeting a 3-year Serviceable Obtainable Market (SOM) target of **50,000 paid bookings per year** (approximately 0.79% of the SAM).

2. Finalized Roadmap & OKRs

- **Geographic Expansion Roadmap:**
  - **Phase 1:** Ho Chi Minh City (Initial beachhead: Districts 1 and 3).
  - **Phase 2:** Hoi An, Hue, and Hanoi.
  - **Phase 3:** Other cultural and craft destinations across Vietnam.
  - **Phase 4:** Selected Southeast Asian markets with similar community-tourism profiles.
- **Key Milestone OKR Metrics (Validation Gates):**

3. MVP Development Planning

A. Scope of the MVP

The MVP is divided into four main user portals:

- **Traveler Side:** Account creation/lightweight onboarding, interactive GIS Cultural Map, workshop browsing, detailed view with date/time availability, host profiles, RSVP/booking, and peer reviews.
- **Host Side:** Simple host registration, workshop creation flow, capacity and schedule settings, RSVP management, and review tracking.
- **AI Copilot:** Two-way traveler-host message translation, workshop Q&A, basic cultural explanations, and grounded RAG-based answers verified by hosts.
- **Admin Panel:** Host identity verification, workshop moderation, user management, and report/review oversight.

B. Key Features & Related Hypotheses

Feature	Description	Related Testable Hypothesis
Dynamic GIS Cultural Map	Location-based discovery map displaying nearby artisans, home kitchens, and craft spaces.	≥65% of travelers cite "lack of transparent discovery outside tourist traps" as a top friction point.
Lightweight Workshop RSVP & Listing Tool	Simplified 3-step listing flow allowing hosts to set slots and limits without complex tech skills.	Artisans can successfully create and manage workshops with minimal technical assistance if the UI is simplified.
AI Cultural Copilot (LangChain + RAG)	Real-time translation and contextual guidance on customs, ingredients, and etiquette grounded in verified workshop data.	Non-English speaking hosts and travelers can conduct a 90-minute workshop with a satisfaction score of ≥4.2/5.0 without human interpreters.
Community Verification & QC System	Identity validation, peer moderation, photo verification, and bi-directional reviews.	International travelers will trust community-hosted homes if backed by platform moderation and verification badges.
Automated Cashless Escrow Payouts	Secure payment gateway integration with direct host disbursement at a 10–15% commission.	Travelers convert at VND 400K–500K per workshop, and ≥80% of hosts accept a 12% take rate.

C. Technology Stack

- **AI & Machine Learning:** LangChain + Retrieval-Augmented Generation (RAG) for the AI Cultural Copilot.
- **Mapping:** GIS mapping engine for the interactive Cultural Map.
- **Database & Backend:** Options include SQLite for rapid local prototyping or PostgreSQL for scalability. Fullstack architecture managed by the core technical team.

D. Development Timeline

- **Qualifying Round 1 (October 5 – November 15, 2026):** Idea formulation, concept finalization, market research, and initial planning.
- **Qualifying Round 2 (November 23, 2026 – January 10, 2027):** Realization phase focused on building the PoC, Prototype, and MVP.
- **Final Round (January 18 – February 27, 2027):** Product refinement, continuous progress reporting, product exhibition, and the live Pitching Day on February 27, 2027.

E. Resources Needed

- **Manpower (Core Team Capabilities):**
  - **Chau:** PM/BA & Fullstack Developer (App development, AI/ML integration, startup leadership).
  - **Tuan:** AI & R&D Engineer (Deep Learning, NLP, Computer Vision, Data Science).
  - **Htet:** Agentic AI & DevOps Engineer (Full-stack development, DevOps, Agentic AI engineering).
  - **Long:** Backend Developer.
  - **Kaka:** Data Engineer.
- **Supporting Resources:**
  - UII Sandbox incubator ecosystem, specialized workshops, Startup Growth Associates (SGA), and faculty mentors from UEH.
  - Digital platforms (UEH LMS, UII ThinkSpace) and physical partnership networks (local boutique hotels and hostels for GTM QR-stand deployment).

Content:

- OKRs template: OKRs Templates: 1 MVP ổn định và test đc với 1 số ng dùng có đc feedbacks
- Setup platform phù hợp
- Làm ra đc cái MVP nhanh nhất có thể (sản phẩm xài được), landing page chỉ là giới thiệu
- Góc nhìn của người dùng, có tips hay thông tin gì thêm để thêm ý tưởng không?
  - Cố gắng tìm những người (khách hàng) hỏi họ xem họ có muốn tham gia những cái tour như v kh, họ có tìm những chỗ local hay không, họ đang có bị những cái problem gì không
  - Họ tìm những trải nghiệm này như thế nào (qua nền tảng gì)
- Anh sẽ tìm kiếm các mentor phù hợp cho nhóm mình

Tuần 2 (19/10/2026 - 25/10/2026):

- ***Workshop #3: (Hands-on) Prototype and MVP Development***
  - **Thời gian:** 18:00 - 20:30 (Thứ Tư, 21/10/2026)

- **Địa điểm:** B2.207, UEH cơ sở B, 279 Nguyễn Tri Phương, phường Diên Hồng, TP. Hồ Chí Minh .

- Bi-Weekly Update #1
  - **Thời gian:** trước 23h59 Thứ Bảy (24/10/2026)
  - **Nội dung: OKRs và MVP Development Plan**

- Milestone Presentation.
  - **Thời gian:** Ngày 27 tháng 10 năm 2026 (thứ Ba)
  - **Hình thức:** Online thông qua nền tảng Microsoft Teams.
  - **Nội dung:** Kế hoạch Phát triển Prototype và MVP trong 4 Tuần
  - **Thời hạn nộp slide:** 23h59, Chủ Nhật, 25/10/2026 (Slide có thể chỉnh sửa sau khi nộp)
